| 7. | Comment Form and Informal Q & A (8:05 – 8:30) | |

Preferred Expansion Alternative Dot Exercise:

Expansion Alternatives

The Coburg Urbanization Study Team, working within the Oregon statewide planning framework, and under the direction of the Coburg Planning Commission, Coburg City Council, and Urbanization Study Technical Advisory Committee has identified a number of UGB expansion alternatives. There are three residential expansion alternatives and three employment expansion alternatives. Staff's presentation this evening will go into greater detail about how alternatives were selected. Any open house participants who cannot stay for the presentation are still encouraged to participate in the exercise in the time they have.

What to do

The Urbanization Study team is very interested in your feedback on the six expansion alternatives that have been developed. We will provide you with two sets of green, yellow and red stickers. Please use the stickers to rank the expansion alternatives. One set will be for the residential expansion alternatives, and one set will be for the employment expansion alternatives. The stickers should be placed anywhere visible on the map, and should reflect the following:

Green = The expansion alternative that you prefer among all three

Yellow = The expansion alternative that you give second preference to

Red = The expansion alternative which you give third (last) preference to

If you have additional thoughts or concerns related to the expansion alternatives, staff has provided a comment form for providing more detailed feedback on a number of issues including the specific expansion alternatives. Thank you for your feedback. Please feel free to ask any clarifying questions of staff here tonight.
