### Welcome!

Welcome to the regional transportation system planning website prepared by the Central Lane MPO.

Regional Transportation System Planning includes policies, projects, and strategies that guide regionally significant transportation investments within the **Central Lane MPO**. The effort will help put into practice policies and actions to address the future needs of a growing population, while improving safety and efficiency.

The project will involve the communities of **Coburg**, **Eugene**, and **Springfield**, including citizens, staff and elected officials. It will also involve **Lane Transit District (LTD)**, **point2point Solutions (p2p)**, **Oregon Department of Transportation (ODOT)**, **Lane County**, and **Lane Council of Governments (LCOG)**.

**Your input and involvement is welcome and encouraged**, so get involved with the project by adding your name to our stakeholder list, providing input on our interactive Input Map, or by **sending us your ideas and comments**.

Our job will be to coordinate with the transportation planning efforts of our local partners to craft an innovative set of policies, goals, and objectives that will link land use and transportation decisions to promote sustainability and use public funding responsibly. All transportation modes will be considered and included--from cars, transit, bikes, and pedestrians--to the freight movement and regional aspects of air, rail, and inter-city bus or EmX service (local bus rapid transit).

## Planning for Coburg's transportation future

### Welcome

The **City of Coburg** is studying the current transportation system to determine how it can best serve the long-term (20-year) needs of Coburg's residents, businesses, and visitors. The result of this study will be a Transportation System Plan (TSP) that will include all transportation modes, including freight, pedestrians and bicyclists, transit, and cars.

Your involvement in this project is very important! To learn more about the history and purpose of the project, read about the **project background**. You can also review **who is involved** in the project and **how to get involved** in upcoming events and meetings. Public involvement will be crucial to the success of this project—crucial to understanding the goals of the community for the development of Coburg over the next 20 years.

## Planning for Eugene's transportation future

### Welcome

The **City of Eugene** is studying the current transportation system and how it could change to better meet the long-term needs of Eugene's residents, businesses, and visitors. The result of this study will be a Transportation System Plan (TSP) that will include all transportation modes, including freight, **pedestrians and bicyclists**, transit, rail networks, **airport**, and personal vehicles.

A related study is called **Envision Eugene**, which will plan for the city's next 20 years' needs for housing and employment.

Your involvement in this project is very important! To learn more about the history and purpose of the project, read about the **project background**. You can also review **who is involved** in the project and **how to get involved** in upcoming events and meetings. Public involvement will be crucial to the success of this project, to understand the goals of the community for the development of Eugene over the next 20 years.

### What's New?

- Take the **survey** to tell us about your your community (both in Eugene and the region).
- The **first DAC meeting** will be on January 5th, 11:00 am in the **Eugene Library's Bascom-Tykeson Rooms**.
- The **Envision Eugene** Open House was held on October 28th.

## Welcome to the Springfield Transportation System Plan (TSP) Website!

### Welcome

The City of Springfield is conducting a planning process to look at how the transportation system is currently used and how it should change to meet the long-term (20-year) needs of Springfield's residents, businesses, and visitors. Through coordination with community members and affected public agencies, the City of Springfield will develop a plan for improvements of all modes of transportation in Springfield, including the roadway, bicycle and pedestrian, transit, and rail networks. The Plan will also include a transportation improvement and financing plan.

This project will result in a Transportation System Plan (TSP) for Springfield and an update to Springfield's portion of the Regional Transportation System Plan (RTSP) being prepared by the Lane Council of Governments.

The TSP is being prepared in coordination with the [Oregon Department of Transportation](#), [Lane Council of Governments](#), and the [Oregon Department of Land Conservation and Development](#). This project will also closely consider local, regional and state policies, plans, and rules, including the Oregon Highway Plan and the region's transportation system plan.

Your involvement in this project is very important to transportation planning in Springfield! To learn more about the history and purpose of the project, read about the [project background](#). You can also
