

Citizen Advisory Committee

West Eugene EmX Extension

DISCUSSION ITEMS

This outline is for your use as you think about the various alternatives for the West Eugene EmX Extension project. It is meant to inform the discussion only—*(it is not a homework assignment and you are not required to fill it out)*.

1. As you consider the alternatives for extending EmX to West Eugene, including the three Build alternatives and the No Build alternative, **what factor(s) will be most important to you?**

Examples of factors could include future ridership, ongoing operational costs, private property impacts, opportunities for economic growth, air quality or GHG emissions, overall transit system efficiency, and bicycle and pedestrian benefits. Other critical factors can be found in the Alternatives Analysis Report and the MPO's Regional Transportation Plan goals, objectives and policies.

2. Do you feel that **you and/or the CAC have enough information** about these important factors to participate fully in the discussion to select a Locally Preferred Alternative?
 - a. If not, **what information do you need** to have at a minimum to more fully participate in this discussion?
 - b. Is there **anything else you feel is needed** in order for the CAC to participate fully in the discussion to select a specific Locally Preferred Alternative for the West Eugene EmX Extension project?
