

Federal Fiscal Years

Adopted May 7, 2020 Update approved November 5, 2020

Central Lane Metropolitan Planning Organization

Central Lane MPO

Metropolitan Transportation Improvement Program Federal FY 2021 through Federal FY 2024

> Published by Lane Council of Governments 859 Willamette Street, Suite 500 Eugene, Oregon 97401-2910 (541) 682-4283 www.lcog.org www.thempo.org

This report was financed in part by the Oregon Department of Transportation, the Federal Highway Administration, and the Federal Transit Administration.

RESOLUTION 2020-03

ADOPTING THE CENTRAL LANE METROPOLITAN PLANNING ORGANIZATION FY21-24 METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP)

WHEREAS, the Lane Council of Governments (LCOG) has been designated by the State of Oregon as the official Metropolitan Planning Organization (MPO) for the Central Lane region; and

WHEREAS, the LCOG Board has delegated responsibility for MPO policy functions to the Metropolitan Policy Committee (MPC), a committee of officials from Eugene, Springfield, Coburg, Lane County, Lane Transit District, and ODOT; and

WHEREAS, the development of an MTIP that delineates the funded activities over multiple fiscal years is among the major requirements of the Metropolitan Transportation Planning Process; and

WHEREAS, the Central Lane Metropolitan Planning Organization has developed an MTIP for FFY21-24, in coordination with the Oregon Department of Transportation (ODOT); and

WHEREAS, the MTIP has been reviewed and is found to conform to all federal and state planning regulations and to reflect the priorities for regional transportation investments for FFY21-24; and

WHEREAS, the improvements included in the MTIP have been drawn from or have been determined to be wholly consistent with the MPO's long range Regional Transportation Plan; and,

WHEREAS, the improvements included in the MTIP using STBG and CMAQ funds are consistent with the project selection criteria and process identified in the MTIP; and,

WHEREAS, the improvements included in the MTIP demonstrate fiscal constraint; and,

WHEREAS, an Air Quality Conformity Determination for the MTIP is prepared and demonstrates compliance with the Clean Air Act; and,

WHEREAS, the draft MTIP document has been published or otherwise made readily available for public review including in an electronically accessible format on the MPO's website; and

WHEREAS, a public review and comment period has been conducted, and the Metropolitan Policy Committee has approved the public review process;

NOW, THEREFORE, BE IT RESOLVED:

THAT, the FFY21-24 Metropolitan Transportation Improvement Program, Exhibit A, is hereby adopted;

THAT, the newly adopted FFY21-24 MTIP will be put into effect no later than the effective date of the FFY21-24 STIP.

PASSED AND APPROVED THIS 7th DAY OF MAY, 2020, BY THE METROPOLITAN POLICY COMMITTEE.

ATTEST:

Christine Lundberg, Chair

Metropolitan Policy Committee

Brendalee Wilson, Executive Director Lane Council of Governments

May 28, 2020

Kate Brown Governor, State of Oregon 160 State Capitol 900 Court Street Salem, OR 97301-4047

Dear Governor Brown:

We are pleased to present the FY 2021-2024 Metropolitan Transportation Improvement Program (MTIP) for the Central Lane Metropolitan Planning Organization (MPO) Urban Area for your approval as required by 23 CFR Part 450, Subpart C (Section 450.326 (a)).

The Central Lane MTIP was adopted by the MPO Policy Board on May 7, 2020. The Central Lane MPO Policy Board is comprised of elected and appointed officials from the cities of Coburg, Eugene and Springfield, Lane County, the Lane Transit District, and an appointed representative from the Oregon Department of Transportation.

The transportation improvements contained in our adopted MTIP address a broad range of multi-modal transportation issues. The document meets all applicable state and federal requirements and was developed through close collaboration of local agencies and ODOT. The MTIP is financially constrained and the required Air Quality Conformity Determination was also approved by the Policy Board on May 7, 2020.

Thank you for your consideration. Please contact me if you have any questions.

Sincerely,

O.E.Tep

Paul E. Thompson Manager, Central Lane MPO Lane Council of Governments

What is the MTIP?

The MTIP is the Metropolitan Transportation Improvement Program for the Central Lane metropolitan area. It describes transportation improvements and projects which the area can expect between federal fiscal years (FFY) 2021 and 2024, which covers the period of time from October 1, 2020 through September 30, 2024. The MTIP describes the near-term priority projects for achieving the long-range goals of the <u>Regional Transportation Plan</u>¹. The document is a public information tool that can inform local policy makers, affected agencies and the general public about regional transportation investments they can expect over the next four years. The federal requirements of a Metropolitan TIP are described under <u>Title 23, U.S.C. Sec. 134 (j)</u>.

The Central Lane Metropolitan Planning Organization (MPO) is a transportation planning entity that is funded by federal legislation and required in all metropolitan areas of 50,000 people or more. MPOs are responsible for administering a portion of the transportation funding provided for in the Fixing America's Surface Transportation (FAST) Act of 2015. The MPO is governed by the Metropolitan Policy Committee (MPC), made up of representatives from the Cities of Coburg, Eugene and Springfield, as well as Lane County, Lane Transit District, and ODOT. A map of the Central Lane MPO boundaries can be found in Appendix A.

The Statewide Transportation Improvement Program (STIP) is prepared by the Oregon Department of Transportation (ODOT) and describes transportation investments expected statewide between FFY 2021 and 2024. The STIP includes the projects listed in the MPOs' MTIPs. When changes are made to projects, the MTIP and the STIP are amended simultaneously to ensure consistency.

The TIP also serves as a vehicle for supporting certain performance targets and includes documentation of how the projects are directly linked to federal performance measures and other performance-based plans.

¹ http://thempo.org/564/Regional-Transportation-Planning

INTRODUCTION

The MTIP serves as the implementation arm of the MPO's long-range Regional Transportation Plan (RTP). The MTIP contains a list of specific, short-term prioritized transportation projects in the Central Lane metropolitan area surrounding Eugene and Springfield that are scheduled to utilize federal funding during FFY 2021-2024. The MTIP includes projects that receive federal funds, are subject to a federally required action, or are regionally significant. Apart from some improvements to Eugene's airport and rail lines, all regionally significant transportation projects and federally funded capital projects that are scheduled to be started within the next four years are part of the MTIP. This means that many- but not all- transit, highway, local roadway, bicycle and pedestrian investments in upcoming projects in the region are included in the MTIP.

The MTIP sets forth the MPO's investment priorities for transit and transit-related improvements, highways and roadways, bicycle and pedestrian, and other surface transportation improvements, transportation planning and programs or capital purchases. Only those projects listed in the MTIP will be included in the Statewide Transportation Improvement Program (STIP) to be eligible for state and federal funding. As a result, the MTIP provides an opportunity to ensure that the transportation investments that the region is making are consistent with its vision and priorities for the regional transportation system. The following diagram outlines the interconnectivity of the MTIP and STIP:

Oregon Transportation Plan

- Long-Term
- Developed by OTC
- Multimodal
- Serves as state transportation system plan
- Framework for prioritizing transportation improvements and funding

Statewide Transportation Improvement Program

- four-year listing of projects planned for implementation
- All FHWA and FTA funded projects
- All regionally significant projects requiring federal approval or permit
- Includes all MTIP projects approved by MPOs
- Financially constrained by year

Regional Transportation Plan

- The broad framework plan for the MPO
- Has both long and short range policies, strategies, and actions
- Lists projects needed within 20 years
- Contains cost estimates and funding sources
- Provides a framework for choosing future projects
- Updated about every four years
- Includes the transportation demand management element

Metropolitan Transportation Improvement Program

- four-year list of priority projects
- Consistent with Regional Transportation Plan
- Financially constrained by year
- Updated about every three years

In the Central Lane MPO, the Transportation Planning Committee (TPC), as the standing committee for air quality under the Oregon Conformity Rulings, has determined regionally significant projects to be:

A transportation project, other than an exempt project (see <u>40 CFR Section 93.126</u>), that is on a facility which serves regional transportation needs, such as access to and from the area outside the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves, and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum:

- All fixed guideway transit facilities that offer an alternative to regional highway travel;
- Projects on facilities classified as arterial level and above;
- Projects on multi-lane facilities that impact speed and/or capacity; and
- Construction of new roadways classified as arterial level and above.

How does the MTIP reflect the region's priorities?

Only projects included in or fully consistent with the RTP may be programmed into the MTIP. The MTIP derives all its projects either directly from the RTP or indirectly from the goals and policies within it. The RTP is the long-range policy and planning document while the MTIP is the short-term implementing document that enables those planned projects to begin work. Specifically, the MTIP lists those projects from the RTP that have committed or reasonably available funding and intend to begin a phase of work during the four years of the MTIP.

In adherence to the CLMPO Public Participation Plan (PPP), significant public outreach is conducted prior to the adoption of the MTIP in order to ensure that the projects contained within it reflect the region's priorities. The draft MTIP is reviewed by the staff advisory Transportation Planning Committee (TPC) which approves releasing the draft document for a 30-day public review and comment period, during which time the draft is available on the MPO's website (thempo.org), distributed to an interested parties list, and advertised through lanevoices.org, an online venue for sharing information, discussion and providing comments. A public hearing is held during the public comment period at a meeting of the Metropolitan Policy Committee (MPC). A final draft version of the document incorporating any revisions resulting from the public outreach and committee review processes, is recommended by TPC for approval by the Policy Board, after which the MTIP is considered and adopted by MPC.

Due to precautions related to the COVID-19 virus, some of these public meetings took place virtually in order to adhere to the mandates of the Governor and other authorities to maintain adequate physical distance between individuals. The April MPC (including the public hearing), April TPC, and May MPC were each held virtually utilizing either Zoom or Go2Meeting technology.

The public involvement process for the MTIP also satisfies the Federal Transit Administration (FTA) Program of Projects (POP) review for federally funded MTIP transit projects. The public notice of public involvement activities and time established for public review and comments on

the MTIP development process will also note that the public process is satisfying the FTA's Program of Projects requirements (23 CFR 450.326(b)).

How are projects listed in the MTIP?

There are several different ways that projects are added to the MTIP, including the following:

- For federal projects over which the Central Lane MPO has discretionary funding authority the MPO solicits its local partner agencies for projects to be included in the MTIP. The MPO has established funding targets for different types of projects (e.g. Transportation Options/Transportation Demand Management activities, planning activities, and Project Development, Preservation, and Modernization (PPM) activities across all transportation modes within the MPO) and allocates funding based upon these targets. For PPM activities, the MPO uses evaluation criteria based upon regional priorities to select projects for programming in the MTIP. The evaluation criteria include the project's impact in preserving existing transportation assets, preserving or enhancing transit services, improving safety, or reducing greenhouse gas emissions (see Appendix C). The MPO receives, on average, approximately \$7 million per year in discretionary federal funds that are allocated through this process. Priorities for the use of these funds are generally established before or during development of the MTIP. Additional details on the process of programming CLMPO's discretionary federal funds are provided in Appendix B.
- Locally funded projects are drawn from the Capital Improvement Programs of Eugene, Springfield, Coburg, Lane County, Lane Transit District (LTD), and ODOT.
- LTD submits projects to be funded with Federal Transit Agency (FTA) funds. LTD has been designated as a direct recipient of a number of different federal funds, permitting LTD to manage their allocation and expenditure, subject to the program rules.
- ODOT submits projects to be implemented within the four-year time frame of the MTIP. The State uses its federal funds as well as state funds for transportation projects within the MPO area. Some are used on the state highway system; others are grants awarded for specific projects subject to the originating source program's rules.

Terminology

- The MTIP project list is grouped by agency sponsoring the project. The project name, project description, unique Key Number (as assigned by ODOT), project phase(s), and funding source(s) are shown for each project.
- The MTIP must be financially constrained by year, meaning that the amount of dollars programmed (committed) must not exceed the amount of dollars known or reasonably expected to be made available. All projects must have identified and committed funding or, if not programmed to start within two years, reasonably certain funding within the MTIP period. The MTIP includes a financial summary that demonstrates financial

constraint, in other words, demonstrates that sufficient financial capacity exists for programmed projects to be implemented.

- The MTIP will also be accompanied by an air quality conformity determination (AQCD). An AQCD ensures that the implementation of the MTIP will not cause or contribute to local air quality violations. Though the community is concerned about transportation's impact on greenhouse gas emissions, an analysis of greenhouse gas emissions is not completed under the AQCD. The MPO has separately completed a greenhouse gas inventory for the region and is focusing on strategies to reduce transportation's impact on greenhouse gas emissions.
- Transportation projects within the MPO area are funded through a variety of different funding sources, including federal funds, but also including local and state funds. The different funding sources are detailed in the MTIP document. Many federal funding programs require that a local government provide a match to the federal funds. The match requirements can vary depending on the source of funds. Local governments also have Capital Improvement Programs and operations budgets which fund transportation improvements and operations, which are listed as either match or other fund sources on the MTIP list. These funds are obtained from bonds, system development charges, and other sources of local revenue. While local funds must be used for matching federal funds, they are also expended for local operations and improvements which are not included in the MTIP.
- A transportation project generally has multiple stages or phases which are funded. The following provides a brief description of the types of activities included under these phases:
 - Planning (PL): Some projects are studies that examine various aspects of travel behavior, choice of transportation mode, land use interactions, etc. These projects may not directly lead to construction.
 - Preliminary design (PE): engineers investigate the range of design alternatives and specific elements that are to be included in the project through basic engineering work, data collection, and environmental analyses; this phase may include public outreach and input.
 - Right of Way (RW): potential right-of-way needs are identified; right-of-way issues are resolved through property and easement acquisition, owner relocation or owner compensation.
 - Utility Relocation (UR): utilities are relocated, as needed, to accommodate construction.
 - Construction (CN): construction work is accomplished. It does not start until the project bid has been advertised, a bid opening occurs, and a contract is awarded. Bonds, insurance and subcontractor compliance requirements must be met.
 - Other (OT): includes other types of projects/phases which do not fit into those phases described above. Transit investments often fall into this category.

By adopting the MTIP, the MPO approves the projects identified in Project List for implementation and funding as scheduled therein. If additional funds become available or if a project experiences an unexpected delay, MPC may select other projects to take advantage of the funds or to replace a delayed project through the appropriate amendment process.

THE PREVIOUS MTIP

On October 1, 2020, this FY2021-2024 MTIP replaces the FY2018-2021 MTIP as the active TIP for the Central Lane MPO. Some major projects implemented in the FY2018-2021 MTIP include:

OR569: Beltline at Delta Highway Interchange, ODOT \$22.3M I-105 Willamette River Connections & 1st to 7th Ave Viaducts, ODOT \$18.8M Preventive Maintenance, LTD \$15.7M Santa Clara Community Transit Center, LTD \$10.6M OR569: Roosevelt Blvd – Coburg Rd, ODOT \$9.5M OR126: Cornerstone Dr. to Terry St., ODOT \$8.6M South Willamette Street enhancement, Eugene \$7.9M Willamette River WB Bridge, ODOT \$7.3M Coburg Rd: Ferry St RR bridge to Willamette R bridge, Eugene \$6.2M Fare Management System, LTD \$5.2M Ridesource ADA Paratransit & Shopper, LTD \$5.1M Zero Emissions Bus Replacements, LTD \$4.6M 13th Ave: Lincoln St to Alder St, Eugene \$4.2M 8th Avenue Streetscape and Bikeway, Eugene \$3.4M OR58: Goshen-Pheasant Lane, ODOT \$3.4M Glenwood Facility Building and Parking Lot Improvements, LTD \$3M Diesel Bus Replacements, LTD \$3M OR126: Eugene to Veneta, ODOT \$3M Amazon Active Corridor: Martin Street – 33rd St, Eugene \$2.4M River Rd at Irving Rd, Eugene \$2.4M MovingAhead NEPA: NW Eugene to LCC, Eugene, LTD \$2.2M Willow Creek Terminus Station, LTD \$2M OR126B: S 20th Street – 75th Street, Springfield, ODOT \$2M

Delays associated with the 2018-2021 MTIP projects were mostly minor in nature involving IGA turn-around times and/or TIP amendment approval processes resulting from poor bids. However, there were also significant delays to projects resulting from an unanticipated Buy America hold from FHWA and increased scrutiny and administration required for delivery of CMAQ projects.

CLMPO was been working with ODOT and the other Oregon MPOs to address timely obligation of our Federal projects and to reduce project delivery delays. This is being addressed in CLMPO by continuing to work with ODOT to develop and recommend a system of rewards and penalties for annual obligation achievement; by completing an overhaul of the CLMPO funding application to clarify many project details prior to funding including a detailed timeline, conservative cost estimates and declaration of readiness; more active participation by the ODOT Local Agency Liaison at TASC and TPC meetings; and by holding annual project audits with local agency staff to catch potential delays early in the fiscal year.

DEVELOPMENT AND MODIFICATION OF THE MTIP

The draft Central Lane MTIP was developed by the Transportation Planning Committee (TPC), the regional staff group which is responsible for most of the technical details of the transportation planning process. The TPC assembled the MTIP from the adopted CIPs, the draft STIP, and other capital planning documents and input from the participating agencies, as well as from the overlapping year of the previous MTIP.

TPC recommends the MTIP to the MPC for review and adoption. As the MPO policy body, MPC, which is composed of elected or appointed officials from Eugene, Springfield, Lane County, Lane Transit District, Coburg and ODOT, conducts a public hearing and adopts the MTIP. The MPO's Public Participation Plan (PPP) specifies public outreach and involvement activities associated with adoption and amendment of the MTIP. TPC and MPC membership is shown in Appendix D.

CALL FOR PROJECTS AND PROJECT SELECTION

Prior to each TIP cycle, typically every two years, the MPO and its partner agencies plan a project solicitation through which applications are accepted, screened, reviewed, discussed, prioritized, and eventually recommended for funding to the MPO Policy Board by the Transportation Planning Committee (TPC). the MPO's priorities for the use of that cycle's discretionary federal funding is ultimately decided following public involvement and programmed into the TIP as dedicated project-specific funding.

When CLMPO opens a call for projects, it is noticed on the MPO website (thempo.org), discussed at public MPO committee meetings, and distributed as an email to the MPO distribution list. The funding application developed by CLMPO is designed to screen projects for eligibility, provide required information for programming purposes (MTIP database and STIP database), ensure that if programmed, the project would support the MPO's goals as articulated in the RTP, support the relevant performance targets, and to provide sufficient details to allow for project prioritization. The funding application form developed and used for the 22-24 cycle of funding is provided in Appendix C.

Once original screening is completed by MPO staff, all funding applications are made available to the members of the Technical Advisory Subcommittee (TASC) which is the venue for project review and discussion prior to TPC's recommendation. A preliminary prioritization occurs through the TASC meetings based upon how well the projects address the four regional priority areas (unchanged from the 2018-2021 TIP cycle) identified by the MPO Policy Board, which are:

Improve Safety Preserve Existing Transportation Assets Preserve or Enhance Transit Services Reduce Greenhouse Gas Emissions

TASC considers any additional benefits of the project as well, which may include congestion reduction, PM10 benefits, reduced SOV reliance, supporting multi-modal travel, connectivity, access to opportunity, freight, public health, etc. For projects eligible for CMAQ funding,

emphasis is placed on the estimated emissions reduction for PM10 and the project's cost efficiency, as well as the readiness of the project since the CMAQ program requires additional reporting and project eligibility verification through an additional application to ODOT, which often results in delays getting projects off the ground. As a result of this process, the draft list of priority projects is not strictly based on a hard numerical score, but rather on the combined relative merits of each project, built upon each project's more solid quantifiable aspects.

The draft list of priority projects is presented at a public meeting of the TPC who recommends the list be released for a 30-day public comment period, during which a public hearing is held at MPC (Policy Board meeting). TPC will review public comments received and testimony offered at the public hearing and recommend a final list of priority projects for MPC approval. MPC will have one final opportunity to review any public input or make any further suggestions for revision of the list before finally approving the funding priorities. At this point the projects may be programmed into the MTIP and STIP, preparatory to project delivery.

PROJECT MODIFICATIONS

Because project schedules and costs as well as the financial constraints of the MTIP may change during the course of the fiscal year, the MTIP may be modified after it has been adopted.

Objectives of the process for developing and amending the MTIP include:

- Ensure that federal requirements are properly met for use of available federal funds, including the requirement that projects using federal funds are included in the MTIP and that the projects are consistent with the financially constrained element of the Regional Transportation Plan (RTP);
- Ensure regional consideration of proposed amendments having an impact on the priority for use of limited available resources or having an effect on other parts of the transportation system, other modes of transportation or other jurisdictions;
- Ensure that the responsibilities for project management and cost control remain with the jurisdiction sponsoring the project;
- Authorize routine amendments to the MTIP to proceed expeditiously to avoid unnecessary delays and committee activity;
- Provide for dealing with emergency situations; and
- Ensure projects are progressing to fully obligate annual funding in order to avoid a lapse of funds.

FHWA and FTA have established conditions for amending an adopted TIP. Although these conditions are currently under review and will possibly be adjusted during the period covered by this MTIP, the current conditions for amending are:

1. Adding or cancelling a federally funded, and regionally significant project to the STIP and state funded projects which will potentially be federalized

2. Major change in project scope. Major scope change includes:

- Change in project termini greater than .25 mile in any direction
- Changes to the approved environmental footprint
- Impacts to AQ conformity
- Adding capacity per FHWA Standards
- Adding or deleting work type

3. Changes in Fiscal Constraint by the following criteria:

- FHWA project cost increase/decrease:
- Projects under \$500K increase/decrease over 50%
- Projects \$500K to \$1M increase/decrease over 30%
- Projects \$1M and over increase/decrease over 20%
- All FTA project changes increase/decrease over 30%

4. Adding an emergency relief permanent repair project that involves substantial change in function and location.

Other changes to an adopted TIP, described by FHWA and FTA as "administrative/technical adjustments," may be made via a more expedited process. These include:

Advancing or Slipping an approved project/phase within the current TIP (If slipping outside current TIP, see FHWA/FTA amendments #2)

Adding or deleting any phase (except CN) of an approved project below FHWA/FTA amendments #3

Combining two or more approved projects into one or splitting an approved project into two or more, or splitting part of an approved project to a new one.

Splitting a new project out of an approved program-specific pool of funds (but not reserves for future projects) or adding funds to an existing project from a bucket or reserve if the project was selected through a specific process (i.e. ARTS, Local Bridge...)

Minor technical corrections to make the printed STIP consistent with prior approvals, such as typos or missing data.

Changing name of project due to change in scope, combining or splitting of projects, or to better conform to naming convention. (For major change in scope, see FHWA/FTA amendments #2)

Adding a temporary emergency repair and relief project that does not involve substantial change in function and location.

While MPC retains general authority over all modifications to the MTIP, approval authority for certain amendments, adjustments, and corrections has been delegated to TPC and MPO staff, respectively. The following graph identifies MTIP actions and the party or parties to whom approval authority for those actions has been delegated.

| MTIP Action | Аррг | oval Auth | hority | |
|--|------|-----------|--------|--|
| MITP ACtion | MPC | TPC | Staff | |
| Adoption of MTIP and document content updates | х | | | |
| Revisions to MTIP policies and procedures | х | | | |
| Initial programming of TMA funds (STBG, TA, CMAQ) | х | | | |
| Re-programming of TMA funds to project(s) <u>not</u> previously approved by MPC for TMA funding | х | | | |
| Re-programming of TMA funds to project(s) previously approved by MPC for TMA funding | х | х | | |
| Adding or cancelling a federally funded, and regionally significant project to the STIP and state funded | | | | |
| projects which will potentially be federalized | X | х | | |
| Major change in project scope (by Federal criteria) | х | х | | |
| Changes in Fiscal Constraint (by Federal criteria) | х | х | | |
| Adding an emergency relief repair project (permanent or temporary) that involves (or does not | | | | |
| involve) substantial change in function and location. | x | x | | |
| Advancing or Slipping an approved project/phase outside its current TIP | х | х | | |
| Recommendation for Project or Program Authority Retraction | х | х | | |
| All other MTIP actions | х | х | х | |

MTIP actions approved by MPO staff will rely on concurrence of agencies affected by the proposed action rather than on concurrence from MPC or TPC quorum. For informational purposes, all amendments approved by MPO staff are forwarded to TPC and those approved by TPC are forwarded to MPC. MPC or TPC may request further review of MTIP actions.

PERFORMANCE BASED PLANNING AND PROGRAMMING

Performance measures, in transportation are data about the use, condition, and impact of the transportation system reported for illustrative purposes to demonstrate progress made toward established targets. Federal law requires that TIPs be designed such that once implemented, progress is made toward achieving the performance targets that are identified in the RTP. The TIP must demonstrate how the projects support those targets.

With the passage of MAP-21 (Moving Ahead for Progress in the 21st Century) in 2012, the US DOT signaled a change in how surface transportation planning and programming would be conducted in the future. In an effort toward more transparency and increased accountability, MAP-21 required DOTs and MPOs to use an outcomes and performance- based planning paradigm when developing long-range plans and programming projects for funding in the TIP/STIP (see 23 CFR 450.306 (d), 23 CFR 450.324 (g) (3-4) and 23 CFR 450.326 (c-d)). FAST (Fixing America's Surface Transportation) Act (2015) continued these requirements. The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have provided final rules on the targets to be used to show progress toward meeting the national goals. The national goals are:

- Safety To achieve a significant reduction in traffic fatalities and serious injuries on all public roads;
- Infrastructure condition To maintain the highway infrastructure asset system in a state of good repair;
- Congestion reduction To achieve a significant reduction in congestion on the National Highway System (NHS);
- System reliability To improve the efficiency of the surface transportation system;
- Freight movement and economic vitality To improve the National Highway Freight Network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development;
- Environmental sustainability To enhance the performance of the transportation system while protecting and enhancing the natural environment; and
- Reduced project delivery delays To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process including reducing regulatory burdens and improving agencies' work practices.

In addition to the federally-required measures, the RTP includes a number of indicators that the track progress of transportation conditions and issues that relate to the goals and objectives of

the RTP. This chapter of the RTP provides both an overview of the national and RTP goals, the national performance measures and associated targets, and the regional indicators.

Starting in 2012, FHWA and FTA were responsible for developing the performance measures for the national goals. This was a complex undertaking involving significant outreach and involvement with DOTs, MPOs, transit districts, advocacy groups, and the public. As of May 2018, performance measures have been established for all but one of the national goal categories. The categories for the performance measures are:

Roadway Safety Pavement and Bridge Condition on the NHS Performance of the NHS Transit Asset Management Congestion Mitigation and Air Quality (CMAQ)

Roadway Safety and Transit Asset Management measures require targets to be established each year. Targets for the remaining performance measures are set on a four-year cycle, occurring the year before the scheduled adoption of the RTP.

MPOs can either set a numeric target for each of the performance measures, or they can support the statewide target set by ODOT. MPOs are required to report the progress of these targets every four years. There are no penalties for an MPO that fails to achieve its targets.

ODOT and the MPOs within Oregon coordinated and collaborated in setting the statewide performance measure targets. Documentation of the target setting process is available online². If the MPO elects to establish MPO specific targets for any federally required performance measure, it is established in coordination and collaboration with ODOT to ensure consistency.

The CLMPO Policy Board has in each case elected to support the statewide performance targets. The investment priorities of the 2021-2024 MTIP fulfill the intent of performance-based planning and programming. The supported targets are provided below and are current as of March 2020, although these targets may change throughout the life of this 2021-2024 MTIP.

² ODOT Performance Management Webpage: <u>https://www.oregon.gov/odot/performmang/pages/index.aspx</u>

| | Statewide |
|---|-------------|
| Roadway Safety | Target |
| Serious Injuries per (100 million) vehicle miles traveled | 3.78 |
| Fatalities per (100 million) vehicle mile traveled | 0.73 |
| Number of Serious Injuries (5yr) | 1,274 |
| Number of Fatalities (5yr) | 306 |
| Number of Serious Injuries and Fatalities for non-motorized users (5yr) | 200 |
| Pavement and Bridge Condition on the NHS | |
| Percent of Interstate System Pavements in Good Condition | 35% |
| Percent of Interstate System Pavements in Poor Condition | 0.50% |
| Percent of Non-Interstate NHS Pavements in Good Condition (2-year) | 50% |
| Percent of Non-Interstate NHS Pavements in Good Condition (4-year) | 50% |
| Percent of Non-Interstate NHS Pavements in Poor Condition (2-year) | 10% |
| Percent of Non-Interstate NHS Pavements in Poor Condition (4-year) | 10% |
| Percent of NHS Bridges in Good Condition | 10% |
| Percent of NHS Bridges in Poor Condition | 3% |
| Performance of the NHS | |
| Percent of reliable person-miles on Interstate | 78% |
| Percent of reliable person-miles on Non-Interstate NHS | 78% |
| Truck Travel Time Reliability index measure on Interstate | 1.45 |

TABLE 1: STATEWIDE PERFORMANCE TARGETS

TABLE 2: TRANSIT ASSET MANAGEMENT MEASURES

| | Statewide |
|--|-----------|
| Transit Asset Management Measures (Asset Type) | Target |
| Vehicles - Automobiles | 25% |
| Vehicles - Truck and other Rubber Tire Vehicles | 45% |
| Vehicles - Bus | 25% |
| Vehicles - Cutaway | 40% |
| Vehicles - Van | 41% |
| Vehicles - Minivan | 41% |
| Vehicles - SUV | 23% |
| Vehicles - Automobile | 63% |
| Facilities - Passenger / Parking Facilities | 0% |
| Facilities - Administrative / Maintenance Facilities | 3% |

The projects included in the MTIP contributes to achieving these performance targets. Many are added to the MTIP directly from the adopted RTP, designed also towards achievement of these performance targets. Projects not added directly from the RTP are required at project solicitation to demonstrate through the funding application that the project is consistent with the goals, objectives, and policies thereof, and identify specifically those performance targets the project supports. The project list includes a code linking projects to performance measure categories.

The funding priorities included in this MTIP support the performance measures consistently with other performance-based planning documents including the Oregon Transportation Safety Performance Plan, Highway Safety Improvement Program (HSIP, see project list for specific projects), the CMAQ Performance Plan (see project list for specific projects), the Oregon Group Transit Asset Management (TAM) Plan, and the MPO's Congestion Management Process (CMP).

PROJECT LIST

In accordance with 23 CFR 450.326(g), the project list presents the program of projects scheduled for federal funding obligation within the federal fiscal years covered by this MTIP. Projects are listed by agency and by STIP Key Number. Projects in this table are consistent with Regional Transportation Plan policy and include local projects that implement the RTP. The project list also indicates if the project is outside the air quality maintenance area, whether projects are exempt from carrying out project conformity (see Appendix E), or whether projects may be required to undertake hot spot analysis.

There are no transportation control measures (TCMs) specified for this area (23 CFR 450.326(g)(5)).

This area does not have Americans with Disabilities Act required paratransit and key stations plans (23 CFR 450.326(g)(7)).

Description of Project Listings

Individual projects vary enough that their descriptions are necessarily general. For street projects, all are assumed to be urban cross-section with curb, gutter, underground drainage, and sidewalks, unless otherwise noted. When provisions for bicycles are anticipated, they are specifically mentioned.

Project Name prepared based on ODOT conventions and is the name by which the project is known in the STIP as well as in the MTIP.

Project Description the description provided by the project sponsor; due to STIP constraints, this description may be abbreviated when included in the STIP.

Work Type a description of the type of work the project entails, categorized to conform with STIP groupings.

- ADA Compliance А
- BP Bicycle and/or Pedestrian
- BR Bridge
- CM Congestion Mitigation/Air Quality
- Modernization М

- PL Planning
- PR Pavement Preservation S Safety
- Т Transit
- TC Transit Capital

Ο

Operations

TD Transportation Demand Management

Performance Measure to help satisfy the federal requirement to link investment priorities to performance targets, where projects directly support the federal performance targets, a code is shown in this box. The code refers to the supported performance measure category (or categories) and may support multiple specific targets within that category.

- S **Roadway Safety**
- Ρ Pavement and Bridge Condition on the NHS
- Ν Performance of the NHS
- Т Transit Asset Management
- С Congestion Mitigation and Air Quality

RTP Project Number / Ref. an indication of the consistency of the project with the long-range plan. A project number indicates that the project was specifically identified in the 2040 RTP as adopted on May 4, 2017 and corresponds to its RTP project number. For projects not specifically identified in the RTP, an RTP policy, goal and/or objective is referenced to demonstrate consistency with the plan as per 23 CFR 450.326(i).

Air Quality Status whether a project has conformity exempt status (based on Federal rules as described in 40 CFR Section 93.126) or indicates that a project review at the appropriate phase will determine if a project level conformity and hot-spot analysis are required.

STIP Key the project number assigned by ODOT by which the project is referenced in the STIP. Projects which extend over several years (for example, ongoing transportation options programs or transit capital maintenance) may have a different key number for each fiscal year.

FFY the federal fiscal year (October 1 – September 30) in which the federal funds for the indicated project phase are expected to obligate through a contractual or intergovernmental agreement.

Phase the type of work undertaken in the year indicated. Work that does not fit within the phase categories listed below, are categorized as Other (OT) which often includes transit projects, capital purchases, and studies.

Planning (PL) Preliminary Engineering & Design (PE) Right of Way acquisition (RW) Utility Relocation (UR) Construction (CN)

Federal Funding and Source the amount of federal funding that is programmed for each phase, and the federal fund source. Federal fund source is reflected in the project list as abbreviated terms and federal fund code (e.g. CMAQ Z400 for Congestion Mitigation and Air Quality). Some projects identify ACPO (advance construct) as the federal fund source. Although ACPO are technically state funds, they serve as a temporary stand-in for federal funds prior to obligation to allow for flexibility within the STIP. For more on ACPO see *Demonstration of Financial Constraint*.

Federal Required Match Cost and Source the amount of local money that must be programmed in order to match the federal funding. Different funding sources may require different levels of match.

Other Funding and Source non-federal funds that are programmed for the project phase beyond the (if any) federal match requirement.

Total All Sources the total estimated cost of the project phase.

Eugene, Springfield, and Lane County have remonstrance clauses in their charters that may allow property owners to object to assessments on some types of street projects. Thus, anticipated assessments on some projects may not materialize.

Note on Non-federally Funded Projects

Since the Eugene-Springfield area is classified as a maintenance area for PM₁₀ emissions, all regionally significant projects regardless of funding source must be included for informational and air quality conformity purposes. Each metropolitan area has the option of including other projects in the MTIP. For purposes of providing comprehensive information on transportation improvements programmed for the Central Lane area, the project list may include some of the more major non-federal transportation projects within the MPO.

FTA Section 5307 Program of Projects FFY 21-24

Following the Project List is the listing of FTA Section 5307 projects for FFY21-24. This reflects how LTD is investing their FTA Section 5307 formula funds for the duration of this MTIP period. The public involvement process for the MTIP also satisfies the Federal Transit Administration (FTA) Program of Projects (POP) review for federally funded MTIP transit projects. The public notice of public involvement activities and time established for public review and comments on the MTIP development process will also note that the public process is satisfying the FTA's Program of Projects requirements. (23 CFR 450.326(b))

PROJECT MAP

The project map, provided on the following page, shows the locations of those projects from the 2021-2024 project list that can be placed spatially. Projects are identified on the map by their MTIP ID# as included on the List of Projects. Other non-spatial projects such as operational projects, planning projects, capital purchases or maintenance, ongoing programs such as Safe Routes to School, etc. are not included on the map.

DEMONSTRATION OF FINANCIAL CONSTRAINT

As indicated previously, Federal regulations require that the MTIP be fiscally constrained by year. Specifically, for the MTIP:

"...financial constraint shall be demonstrated and maintained by year and shall include sufficient financial information to demonstrate which projects are to be implemented using current and/or reasonably available revenues..." (23 CFR 450.326(k))

The financial plan must be developed by the MPO in cooperation with the state and the transit operator. ODOT and the Lane Transit District (LTD) must provide the MPO with estimates of available federal and state funds, which the MPO must utilize in developing financial plans. Only projects for which construction and operating funds can reasonably be expected to be available may be included. Projects in the first two years of the MTIP must be limited to those for which funds are available or committed. In the case of new funding sources (rare in CLMPO's funding environment), strategies for ensuring their availability must be identified. In developing the financial analysis, the MPO must take into account all projects and strategies funded under Title 23, U.S.C., the Federal Transit Act, other federal funds, local sources, state assistance, and private participation.

To allow maximum utilization of federal funds, CLMPO with its partner jurisdictions will often program their discretionary federal funds later than other MPOs in Oregon. With constantly shifting priorities and opportunities, this provides for more timely prioritization, allows for better real-time coordination between jurisdictions, and enables the MPO to address shifting funding environments with more flexibility. In some extreme cases, this requires that a percentage of the federal funding that is reasonably expected to be available during the life of the MTIP must be accounted for in general "buckets" of funding to satisfy the requirements of a fiscally constrained program. Thus a program of projects may include non-project specific line items to account for available funding. These will be listed under the CLMPO heading for FHWA funds and under the LTD heading for FTA funds. As the funds are programmed, typically within months of the adoption of the MTIP, these buckets are replaced with specific projects prioritized and programmed through the MPO's funding processes. The MPO website provides the most up-to-date MTIP project list and can be accessed at:

https://thempo.org/371/Metropolitan-Transportation-Improvement-

Advance Construct (AC, or ACP0 in the project list) is a mechanism utilized by ODOT in which nonfederal funds temporarily replace federal funds committed to a STIP project prior to obligation, at which time federal funds (perhaps from a different source than originally programmed) are replaced. This allows ODOT with flexibility and helps with timely delivery of projects. Prior to Federal authorization of a project as AC, the project must be included in the Federally approved STIP/TIP [see 23 CFR 630.705]. The project will support the fiscally constrained element of the STIP/TIP using all or some combination of State, local, and/or private funds. The financial limit on the amount of AC is set by the State's or MPO's ability to demonstrate fiscal constraint. Consideration is given to the future availability of Federal-aid funds to accommodate the AC conversion.

Generally, when an AC project is converted to a Federally funded project, the STIP/TIP will document the full or partial conversion of this project. The amount of conversion is limited to the apportioned Federal-funds available in the category. As with any project, the State is not locked into the category of funds identified in the approved STIP/TIP. If the approved AC "conversion" substantially changes the current STIP/TIP's fiscal constraint determination, the STIP/TIP's will need to be amended. The fiscal constraint determination should be based on the individual, or group of project conversions, or the total amount and source(s) of Federal funds which are presented within the STIP/TIP. The tables below reflect the total project cost by fiscal year for each jurisdiction.

| Jurisdiction | FF | Y21 | FF | Y22 | FF | Y23 | FFY24 | | |

Lane Transit District by Federal Fund Type

The following table provides a summary of the financial analysis and demonstrates that the MTIP is fiscally constrained. Revenues in the first two years are committed, as programmed in the capital improvement programs of the local and state jurisdictions. All funds are from current revenue sources, no new funding sources are identified and thus strategies for ensuring their ongoing availability are irrelevant.

| Description | FY2 | Total | | | | |
|---|--------------|--------------|--------------|--------------|---------------|--|
| Description | FY21 | FY22 | FY23 | FY24 | FY21 - FY24 | |
| Revenues | \$53,797,033 | \$54,833,724 | \$23,594,421 | \$19,364,302 | \$151,589,479 | |
| Expenditures | \$53,797,033 | \$54,833,724 | \$23,594,421 | \$19,364,302 | \$151,589,479 | |
| -Projects Programmed | \$51,002,259 | \$52,067,624 | \$20,828,321 | \$16,598,202 | \$140,496,406 | |
| -Projects Pending* | \$2,794,774 | \$2,766,100 | \$2,766,100 | \$2,766,100 | \$11,093,074 | |
| Difference Between Revenues & Expenditures | \$0 | \$0 | \$0 | \$0 | \$0 | |

Financial Analysis Summary Table

combination of sources reasonably expected to be available over the planning period.

*These are revenues that are anticipated but not yet programmed to specific projects (see MTIP ID # 3, 47, 48, 49). These are programmed collectively by fund source in the Project List for the purposes of financial constraint.

This 21-24 MTIP meets the federal requirements set forth in 23 CFR 450.326(j).

"[it] shall include a financial plan that demonstrates how the approved TIP can be implemented,"

The financial summary information and the accompanying 21-24 MTIP Project List linked to in this section demonstrate how the approved MTIP can be implemented.

"...indicates resources from public and private sources that are reasonably expected to be made available to carry out the TIP, and recommends any additional financing strategies for needed projects and programs."

The financial summary information and the accompanying 21-24 MTIP Project List provide the reasonably expected resources from public and private sources (as applicable) to be made available to carry out the MTIP. Additional financing strategies include coordinating with other agencies to maximize investments and reduce expenses, awareness of new or cycling grant opportunities, working with ODOT to take advantage of fund exchange possibilities especially for non-certified agencies, and coordination with ODOT to Advance Construct funds in order to allow flexibility.

CLMPO's current RTP identifies the following strategies to address revenue shortfall: increased Federal and State taxes and fees; accept lower level of service; special road funding opportunities; stormwater management fee; transportation utility fee; increased systems development charges; transfer of jurisdiction; accept lower standards in operations, maintenance and preservation; bond measures; regional transportation taxes; bridge tolls; broadened assessment practices; postpone project to illustrative projects list.

"In developing the TIP, the MPO, State(s), and public transportation operator(s) shall cooperatively develop estimates of funds that are reasonably expected to be available to support TIP implementation in accordance with § 450.314(a). Only projects for which construction or operating funds can reasonably be expected to be available may be included."

Funding estimates were calculated based on a formula developed through a cooperative interagency effort between the MPOs, Oregon DOT, and others. The estimates are intentionally conservative to err on the side of under-programming rather than over-programming anticipated revenues. The MTIP includes only projects for which construction or operating funds can reasonably be expected to be available, as applicable.

"In the case of new funding sources, strategies for ensuring their availability shall be identified."

Although rare in the Central Lane MPO, new funding sources are always possible. A recent example includes the determination of the Eugene-Springfield area's CMAQ eligibility in 2016, an ongoing source of federal funding which continues to flow through the MPO. The current RTP directly supports, on a policy level, development of a stable and flexible

transportation finance system that provides adequate resources for transportation needs identified in the RTP (see RTP Finance Policy #1). Strategies for ensuring availability of new funding sources include:

- ongoing representation of the MPO's interests in state-wide committees to stay informed and participate in discussions regarding possible new funding
- maintaining up-to-date long-range plans which include a robust list of various project types to accommodate a variety of eligibility requirements
- maintaining a cohesive regional staff committee and processes that can quickly turnaround funding recommendations to the policy committee to facilitate timely utilization of unanticipated funding

"In developing the financial plan, the MPO shall take into account all projects and strategies funded under title 23 U.S.C., title 49 U.S.C. Chapter 53, and other Federal funds; and regionally significant projects that are not federally funded."

All the projects and strategies referenced above were considered as the 21-24 MTIP was developed by MPO staff and its interagency partners.

"For purposes of transportation operations and maintenance, the financial plan shall contain system-level estimates of costs and revenue sources that are reasonably expected to be available to adequately operate and maintain Federal-aid highways (as defined by 23 U.S.C. 101(a)(6)) and public transportation (as defined by title 49 U.S.C. Chapter 53)."

The 21-24 MTIP financial plan provides summary-level costs as well as revenues from public and private sources reasonably expected to be made available to carry out the MTIP. The MPO together with its partner agencies believes that the program of projects included in the 21-24 MTIP provides each year for adequate operation and maintenance of the MPO's Federal-aid highways and public transportation, and that the available revenue is adequate to deliver projects on the schedule proposed in this MTIP. The MPO's current long-range plan³ explores this topic more thoroughly and identifies the MPO's goal of maintaining, through operations, maintenance and preservation investments, a level of 80 percent of the system miles rated at fair or better condition.

It must be noted here that this program was adopted in May 2020, during a worldwide pandemic which has had an enormous impact on transportation and especially the operation of public transportation. Given the uncertainties inherent in the unusual transportation environment anticipated for the period covered by this MTIP, declarations of financial adequacy are made with assumptions of leniency and understanding from our state and federal partners, including those responsible for the enforcement of these declarations.

³ 2040 Regional Transportation Plan, Central Lane MPO, May 2017: https://thempo.org/DocumentCenter/View/5430/Chapters1to4 2040-RTP?bidId=

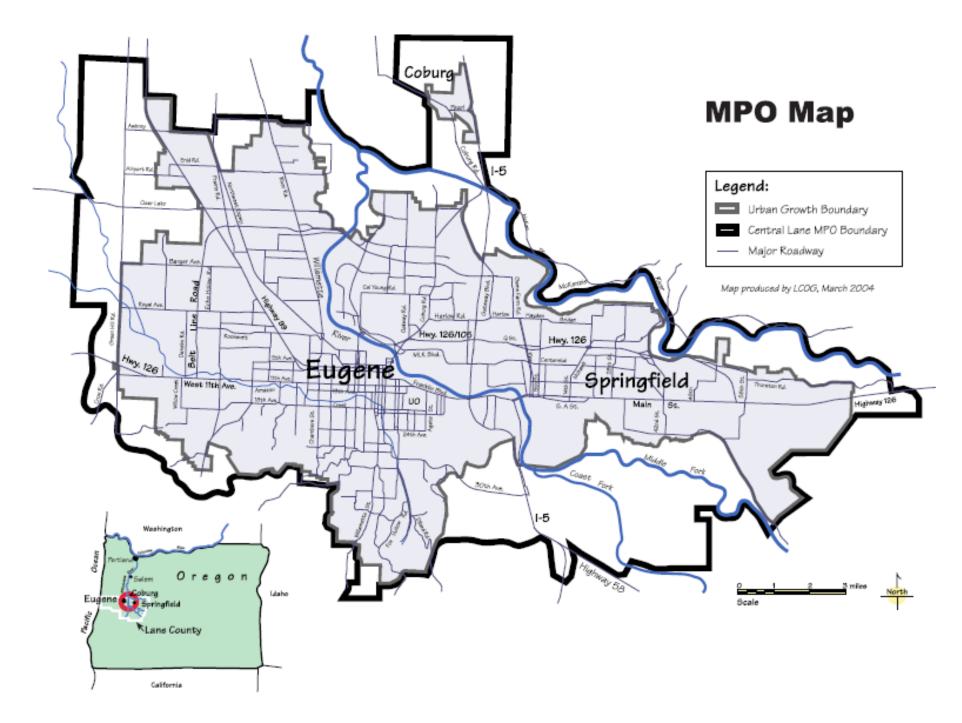

"In addition, for illustrative purposes, the financial plan may include additional projects that would be included in the TIP if reasonable additional resources beyond those identified in the financial plan were to become available."

As adopted, no illustrative projects are included in the 21-24 MTIP financial plan.

"Revenue and cost estimates for the TIP must use an inflation rate(s) to reflect "year of expenditure dollars," based on reasonable financial principles and information, developed cooperatively by the MPO, State(s), and public transportation operator(s)."

The revenue estimates included in the 21-24 MTIP reflect year of expenditure dollars. Those adjusted amounts are provided to the MPO by Oregon DOT and by Lane Transit District as the TIP is being developed. All costs in the 21-24 MTIP reflect year of expenditure dollars. Development of the TIP was accompanied by a major overhaul of the funding application and instructions for the MPO's TMA discretionary federal funds. The application and instructions specify that amounts must be adjusted to reflect year of expenditure dollars. Additionally, agencies are asked to adjust project costs when programming years are requested to slip to a later year.

Appendix A: Map of the Central Lane MPO Boundaries

Appendix B: Programming of Discretionary Funds

As a Transportation Management Area (TMA), the Central Lane MPO is required to develop a process for allocating the MPO's Federal Surface Transportation Block Grant (STBG), Transportation Alternatives (TA), and Congestion Mitigation and Air Quality (CMAQ) funds. Prior to the FAST Act, STBG funds were known as Surface Transportation Program (STP). These discretionary funds are allocated and programmed for eligible projects at the discretion of the MPO, following federal guidelines. These funds must be matched with local funds or other non-federal funds at a minimum currently set by the U.S. Congress for Oregon of 10.27 percent of the total funding. For example, a project totaling \$100,000 would require a local match of at least \$10,270 and a federal component not to exceed \$89,730.

The MPO Policy Board has approved a process and framework for allocating these discretionary funds. The process includes the use of a set of screening or eligibility criteria and a set of evaluation criteria to be applied to applications for funding. Among these are the four regional priorities adopted by the MPO Policy Board: Preservation of Existing Transportation Assets; Preservation or Enhancement of Transit Service; Enhancement of Safety; and Reduction of Greenhouse Gas Emissions. This appendix provides additional details on CLMPO's discretionary fund allocation process.

ELIGIBLE PROJECTS

Projects eligible for funding must be within the CLMPO boundary, be included in or consistent with the Regional Transportation Plan (RTP), and meet the general requirements for federal aid projects as outlined in Title 23, U.S.C. Additional eligibility requirements are summarized below by funding program.

STBG FUNDS - STBG funds may be used for a variety of programs and projects within CLMPO. STBG funds may be used for the following types of activities on the regional transportation system: construction, reconstruction, preservation, or operational improvements of roads and highways; capital costs for transit projects; traffic management systems including traffic signals and interconnects; bicycle and pedestrian improvements; transportation alternatives; surface transportation planning programs; environmental mitigation; ITS (Intelligent Transportation Systems); capital improvements; safety and congestion management improvements; and installation of vehicle-to-infrastructure communication equipment.

In general, STBG funds may not be used for projects on roadways classified as local or rural minor collector. There are a number of exceptions to this requirement including: bridge and tunnel projects; safety projects; fringe and corridor parking facilities/programs; recreational trails, pedestrian and bicycle projects, and Safe Routes to School (SRTS) projects; boulevard/roadway projects largely in the right-of-way of divided highways; and projects within the pre-FAST Act Title 23 definition of "transportation alternatives."

A fact sheet for STBG may be found at <u>http://www.fhwa.dot.gov/fastact/factsheets/stbgfs.pdf</u>.

See <u>https://www.fhwa.dot.gov/specialfunding/stp/160307.cfm</u> for a detailed list of eligible activities.

TA Funds - TA set-aside funds have different eligibility requirements than STBG funds and are more limited in the types of projects and programs that are allowed. TA funds may be used for programs and projects defined as transportation alternatives including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and environmental mitigation; recreational trail program projects; safe routes to school projects; and projects for the planning, design, or construction of boulevards and other roadways largely in the right-of-way for former Interstate System routes or other divided highways. TA funds cannot be used for State or MPO administrative purposes; promotional activities, except as permitted under SRTS; general recreation and park facilities, playground equipment, sports fields, campgrounds, picnic areas and pavilions, etc.; and routine maintenance and operations.

A fact sheet for the TA set aside may be found at: <u>http://www.fhwa.dot.gov/fastact/factsheets/transportationalternativesfs.pdf</u>.

A detailed list of eligible TA activities is available at: <u>https://www.fhwa.dot.gov/environment/transportation_alternatives/</u>

<u>CMAQ Funds</u> - The CMAQ program provides a flexible funding source for transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce traffic congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide levels or particulate matter ("nonattainment" areas), have recently become compliant ("maintenance" areas), or have at one time been nonattainment or maintenance areas. CLMPO is a limited maintenance area for coarse particulates (PM10). All CMAQ projects must demonstrate the three primary elements of eligibility:

- 1. Be a transportation project;
- 2. Provide an emissions reduction [for PM10 in CLMPO]and;
- 3. Be located in or benefit [primarily] a [current or past] nonattainment or maintenance area

The Federal Highway Administration (FHWA) has outlined CMAQ eligibility within 17 project categories. However, the Oregon Department of Transportation (ODOT) has limited CMAQ eligibility in Oregon to only the following project types:

- Public Transportation Improvements
- Transportation Options Strategies
- Pedestrian Bicycle Infrastructure
- Vehicle and Fuel Efficiency Efforts

- Intelligent Transportation Systems for congestion reduction
- Traffic Flow Improvements for congestion reduction
- Road Dust Mitigation to remove fine particulates (PM10 areas only)

More information on the CMAQ program can be found here: <u>https://www.oregon.gov/ODOT/LocalGov/Pages/CMAQ.aspx</u> <u>https://www.fhwa.dot.gov/environment/air_quality/cmaq/</u>

If the project is selected for CMAQ funding, an additional CMAQ Application is required for the purposes of ODOT and FHWA eligibility determination and for federal CMAQ reporting. MPO staff will complete the CMAQ Application with assistance from the project sponsor.

Design and Construction Standards

Projects on state highways must meet ODOT standards for design and construction or demonstrate the ability to obtain a design exception. All bicycle and pedestrian projects using TA funds should conform to the <u>Oregon Bicycle and Pedestrian Design Guide (2011 edition)</u>⁴. Other projects must meet standards appropriate to the type of work.

Project Size

While there is no set minimum or maximum award, due to the costs of administering a federal project, a minimum cost of \$100,000 is recommended for construction projects and a minimum project cost of \$50,000 is recommended for non-construction projects. If the sponsor intends to eventually exchange a project's federal funds as part of ODOT's State Funded Local Projects program (SFLP), the project must not exceed \$1M.

Matching Funds

All projects require a local match paid by the applicant or by partner organizations. The required local match is 10.27 percent of eligible project costs. Applicants must pay all costs for non-eligible work and all costs incurred before ODOT issues a "notice to proceed." Non-eligible elements of the project and work completed in previous projects do not count as match. Donations of cash, staff time, materials, and property can count as matching funds in some cases.

⁴ https://www.oregon.gov/ODOT/Engineering/Documents RoadwayEng/HDM L-Bike-Ped-Guide.pdf

Appendix C: Funding Application

In the following pages are presented the Central Lane MPO's application form for discretionary funding under the federal programs of Surface Transportation Block Grant (STBG), Transportation Alternatives (TA), and Congestion Mitigation and Air Quality (CMAQ) Improvement. This application form was used during the project selection process for CLMPO's FFY22-24 round of TMA funding. The resulting selected investments are included in the Project List of this MTIP.

CENTRAL LANE APPLICATION FOR: FFY 2022-2024 CLMPO DISCRETIONARY FUNDS MPO

- STBG Funds (Surface Transportation Block Grant)
- TA Funds (Transportation Alternatives)
- CMAQ Funds (Congestion Mitigation and Air Quality Improvement)

The <u>Application Instructions</u> is a companion document to this application and provides section-by-section instructions, additional details, and helpful hyperlinks to assist applicants as they complete the application.

Section 8: Submittal Approval

Project Sponsor Authority Information

The Authorizing Authority identified below approved the submittal of this application on behalf of the Project Sponsor. Project sponsors will be required to sign an Intergovernmental Agreement (IGA) with ODOT prior to receiving any project funds. The IGA with the state will detail the requirements for the use and management of requested funds.

Authorizing Authority Name:

Authorizing Authority Title:

(e.g. Mayor, Executive Director, etc.)

 $\hfill\square$ Submittal was approved by the identified authorizing individual.

Co-Sponsor Authority Information (if applicable)

Authorizing Authority Name:

Authorizing Authority Title:

□ Submittal was approved by the identified authorizing individual.

Section 9: Project Summary Sheet

Follow the *Application Instructions* to complete the project summary sheet form and submit it with this completed application.

Appendix D: Transportation Committees of the Central Lane MPO

Metropolitan Policy Committee (As amended February 2003) Two Council Members of the Eugene City Council Two Council Members of the Springfield City Council Two Commissioners of Lane County Two Board Members of Lane Transit District One Council Member of the City of Coburg One Member from ODOT City Manager, Eugene (non-voting) City Manager, Springfield (non-voting) County Administrator, Lane County (non-voting) General Manager of Lane Transit District (non-voting) City Administrator, City of Coburg (non-voting) Director of the Oregon Department of Transportation or his/her designee (non-voting)

Transportation Planning Committee (As amended May 2005)

Director of Public Works - Lane County Director of Public Works - City of Eugene **Director of Public Works - Springfield Director of Planning - Lane County** Planning Director - City of Eugene Planning Manager - City of Springfield **Director of Development Services - Lane Transit District** Director of Marketing and Communications - Lane Transit District Transportation Planning Engineer - Lane County Transportation Engineer - City of Eugene Traffic Engineer - City of Springfield Region 2 Transportation Representative - Oregon Department of Transportation Manager - Eugene Airport Representative - Lane Regional Air Pollution Authority **Representative - City of Coburg Commuter Solutions Program Manager** Federal Highway Administration Division Planning Engineer (non-voting ex-officio member) MPO's Citizens' Advisory Committee (CAC) chair (non-voting ex-officio member) (note that the MPO's CAC is currently inactive)

Appendix E: Air Quality Conformity

This 21-24 MTIP meets the federal air quality conformity requirements. All projects listed in this MTIP meet the criteria for exemption from project-level conformity analysis.

23 CFR 450.326(a) requires that the MTIP include documentation of Central Lane MPO's air quality conformity and supporting documentation. Project level conformity (including potentially hot-spot analysis) for PM_{10} remains a necessity for all project sponsors of non-exempt projects within the MTIP. This is undertaken in consultation with ODOT Environmental during appropriate phases of the project development.

The 2021-2024 MTIP project list was first reviewed by MPO staff, then by the Technical Advisory Subcommittee (TASC) to the Metropolitan Planning Committee (MPC) to determine exempt status from regional conformity of all projects following the criteria described in <u>40 CFR Section</u> <u>93.126</u>. The project list was then provided to the Interagency consultation group for their review, which consisted of 13 individuals and included representatives from the following agencies:

Central Lane MPO Lane Regional Air Protection Agency Oregon Department of Transportation Region 2 Oregon Department of Transportation Planning Section Oregon Department of Transportation Program Funding Oregon Department of Environmental Quality Federal Highway Administration Federal Transit Agency US Environmental Protection Agency

Non-Exempt Projects

The 21-24 MTIP includes no non-exempt projects at the time of the adoption of this document.

Regionally Significant Projects

Any projects determined to be of regional significance (regardless of funding source) were included in this review as well. In the Central Lane MPO, the Transportation Planning Committee (TPC), as the standing committee for air quality under the Oregon Conformity Rulings, has determined regionally significant projects to be:

A transportation project, other than an exempt project, that is on a facility which serves regional transportation needs, such as access to and from the area outside the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves, and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum:

• All fixed guideway transit facilities that offer an alternative to regional highway travel;

- Projects on facilities classified as arterial level and above;
- Projects on multi-lane facilities that impact speed and/or capacity; and
- Construction of new roadways classified as arterial level and above.

The 42nd Street: operational capacity and safety improvements (Springfield) project is included in the project list as a project of regional significance, even though it utilizes no federal funding. 42nd Street is an arterial roadway and the project will result in added capacity. Since regional air quality analysis is not required under the terms of the MPO area's Limited Maintenance Plan, and since non-federalized projects are not subject to project-level air quality conformity, this project is exempt. However, should the project at any time utilize federal funds, require federal approval, or a federal permit, the project will be subject to project-level conformity and a further review will be necessary at that time in order to ensure that air quality conformity requirements are satisfied.

On March 18, 2020 a public meeting was held wherein TPC reviewed the draft 2021-2024 MTIP and approved it to be released for public comment. The draft project list and the draft 2021-2024 MTIP document were released for a 30-day public comment period which concluded in April 2020. A public hearing was held April 2, 2020 at the Metropolitan Planning Committee (MPC) meeting in Eugene. Public comments received and a summary of the comments provided at the public hearing are included in Appendix F. At their April 15, 2020 public meeting, TPC formally recommended MPC approval of the draft 2021-2024 MTIP (including the proposed list of projects and the conformity determination). These were then approved by MPC at their May 7, 2020 meeting upon consideration of public comments.

Due to precautions related to the COVID-19 virus, some of these public meetings took place virtually in order to adhere to the mandates of the Governor and other authorities to maintain adequate physical distance between individuals. The April MPC (including the public hearing), April TPC, and May MPC were each held virtually utilizing either Zoom or Go2Meeting technology.

Conformity Determination

The air quality conformity determination of the CLMPO FFY2021-2024 MTIP is confirmed in the letter provided on the following pages from U.S. Department of Transportation, dated September 30, 2020.

U.S. DEPARTMENT OF TRANSPORTATION

Federal Highway Administration Oregon Division 530 Center Street, Suite 420 Salem, Oregon 97301 503-399-5749 Federal Transit Administration Region 10 915 Second Avenue, Room 3142 Seattle, Washington 98174-1002 206-220-7954

September 30, 2020

Reply to: HDA-OR/ FTA-TRO-10 File Code: 724.420

Mr. Paul Thompson Transportation Program Manager Central Lane Metropolitan Planning Organization 859 Willamette Street, Suite 500 Eugene, OR 97401

Subject: Air Quality Conformity Determination for the CLMPO 2021-2024 Metropolitan Transportation Improvement Program (TIP)

Dear Mr. Thompson:

The Clean Air Act Amendments of 1990 (CAAA) require that transportation plans, programs, and projects cannot create new National Ambient Air Quality Standards (NAAQS) violations, increase the frequency or severity of existing NAAQS violations or delay the attainment of the NAAQS. The Federal Highway Administration and Federal Transit Administration is required to make a transportation conformity determination in nonattainment and maintenance areas as outlined in 40 CFR 93.104 and 23 CFR Part 450. The CAAA requires States and Metropolitan Planning Organizations (MPOs) to demonstrate, through the conformity process, that the transportation program is consistent with the State Implementation Plan (SIP). Transportation conformity ensures the Federal funding and approval are given to those transportation activities that are consistent with air quality goals and do not worsen air quality or interfere with the purpose of the SIP.

The United States Environmental Protection Agency (EPA) approved the Eugene-Springfield limited maintenance plan (LMP) for particulate matter of less than 10 microns (PM₁₀), effective June 10, 2013 (78 FR 21547). With the approved LMP, the CLMPO is not required to complete regional emissions analysis, however all other transportation conformity requirements still apply (40 CFR 93.109(b)).

FHWA and FTA have completed a review of the Central Lane Metropolitan Planning Organization (CLMPO) conformity determination for the 2021-2024 MTIP, adopted by the Metropolitan Policy Committee (MPC) on May 7, 2020. Based on our review of the CLMPO conformity determination and documentation e-mailed on August 11, 2020, we find that the 2021-2024 MTIP conforms to the SIP in accordance with the Transportation Conformity Rule and the Oregon Conformity SIP. This federal conformity determination was made after interagency consultation with EPA Region 10, Oregon Department of Environmental Quality (ODEQ), Lane Regional Air Protection Agency

(LRAPA), and the Oregon Department of Transportation (ODOT), pursuant to the Transportation Conformity Rule.

If you have any questions, please contact Ms. Jasmine Harris of FHWA at (503) 316-2561 or Mr. Jeremy Borrego of FTA at (206) 220-7956.

Sincerely,

PHILLIP A DITZLER

Appendix F: Public Comments

A public hearing was held April 2, 2020 at the meeting of the Metropolitan Policy Committee at the Springfield Justice Center in Springfield, Oregon. No comments from the public were offered at that time.

A public comment period was open March 26 through April 26. Comments were solicited via the MPO's website and via LaneVoices.org, the MPO's online public engagement tool. No comments were received.

Comments received from local, State, and Federal agency staff have been incorporated into this document, as have staff comments received through the interagency consultation process regarding project air quality conformity.

The 2021-2024 MTIP document adopted May 2020 was revised in October 2020 to include the projects utilizing the MPO's 2021-2024 discretionary funding. The project list and financial constraint elements of the document were also updated accordingly. At the same time, certain clarifying language was added to the financial constraint element to more completely satisfy the requirements set forth in 23 CFR 450.326(j). Comments from the public were solicited, and a public hearing was held regarding these revisions at the November 5, 2020 meeting of the Metropolitan Policy Committee. No comments were received.
