RESOLUTION 2007-07

**APPROVING THE FFY 08-11 CENTRAL LANE
METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP)**

WHEREAS, the Lane Council of Governments (LCOG) Board has been designated by the State of Oregon as the official Metropolitan Planning Organization (MPO) for the Central Lane region; and

WHEREAS, the LCOG Board has delegated responsibility for MPO policy functions to the Metropolitan Policy Committee (MPC), a committee of officials from Eugene, Springfield, Coburg, Lane County, Lane Transit District, and ODOT; and

WHEREAS, the draft MTIP document has been published or otherwise made readily available for public review including in an electronically accessible format on the MPO's web site; and

WHEREAS, the public involvement process described in the MPO's adopted Public Participation Plan has been followed, and public comment has been received and responded to; and,

WHEREAS, transportation projects using several categories of federal funds and projects that are regionally significant for air quality purposes are included in the FFY08-11 MTIP with details describing lead agency, phase, project scope, and cost; and

WHEREAS, the Central Lane MPO Transportation Planning Process has been determined to be in substantial compliance with the required elements of federal transportation legislation; and

WHEREAS, the improvements included in the FFY08-11 MTIP have been drawn from or have been determined to be wholly consistent with the long range transportation plan; and,

WHEREAS, the improvements included in the FFY08-11 MTIP using STP-U funds are consistent with the project selection criteria and process identified in the FFY08-11 MTIP; and,

WHEREAS, the improvements included in the FFY08-11 MTIP demonstrate fiscal constraint; and,

WHEREAS, an Air Quality Conformity Determination for the FFY08-11 MTIP is in preparation and is expected to show compliance with the Clean Air Act;

NOW, THEREFORE, BE IT RESOLVED:

THAT, the FFY08-11 Metropolitan Transportation Improvement Program, Exhibit A, is hereby adopted;

THAT, the newly adopted FFY08-11 MTIP will be put into effect no earlier than October 1, 2007, and no later than the effective date of the FFY08-11 STIP, subject to demonstration of air quality conformity.

PASSED AND APPROVED THIS 9th DAY OF AUGUST, 2007, BY THE METROPOLITAN POLICY COMMITTEE.

Metropolitan Policy Committee

RESOLUTION 2007-10

**ADOPTING THE AIR QUALITY CONFORMITY DETERMINATION
FOR THE 2007-2031 REGIONAL TRANSPORTATION PLAN (RTP) AND THE
FY2008-2011 TRANSPORTATION IMPROVEMENT PROGRAM (TIP)**

WHEREAS, the Lane Council of Governments Board has been designated by the State of Oregon as the official Metropolitan Planning Organization (MPO) for the Central Lane region; and

WHEREAS, the LCOG Board has delegated responsibility for MPO policy functions to the Metropolitan Policy Committee (MPC), a committee of officials from Eugene, Springfield, Coburg, Lane County, Lane Transit District, and ODOT; and

WHEREAS, the Eugene/Springfield area is currently designated as a maintenance area for carbon monoxide under the Clean Air Act; and

WHEREAS, the 2031 RTP and the FY08-11 Metropolitan TIP must demonstrate air quality conformity before both are approved by the MPO or accepted by the federal Department of Transportation, according to the requirements of OAR-340-252-0010 et. seq. and 40 CFR 93.100 et. seq.; and

WHEREAS, the Air Quality Conformity Determination is required to secure funding for transportation projects in the area;

**NOW THEREFORE BE IT RESOLVED BY THE METROPOLITAN POLICY COMMITTEE OF THE
CENTRAL LANE MPO:**

THAT, the Air Quality Conformity Determination for the 2031 RTP and the FY08-11 Metropolitan TIP has been prepared according to state and federal regulations and undertaken through interagency consultation with local, state and federal agencies;

THAT, the Air Quality Conformity Determination for the 2031 RTP and the FY08-11 Metropolitan TIP has gone through a public and agency review period in accord with the requirements of the MPO's Public Participation Plan and OAR-340-252-0060, and that the comments received have been adequately addressed;

THAT, the 2031 RTP and the FY08-11 Metropolitan TIP have been determined to conform to the requirements related to regional air quality emissions contained in OAR 340-252 (Transportation Conformity), and 40 CFR 93 (Determining Conformity of Federal Actions to State or Federal Implementation Plans); and

THAT, the Metropolitan Policy Committee hereby adopts the Air Quality Conformity Determination for the 2031 RTP and the FY08-11 MTIP, as set forth in Exhibits A and B, attached to and incorporated by reference to this resolution.

ADOPTED BY THE METROPOLITAN POLICY COMMITTEE ON THIS 8th DAY OF NOVEMBER,
2007.

Introduction

The Metropolitan Transportation Improvement Program (MTIP) is a listing of transportation improvements scheduled in the Central Lane Transportation Management Area (TMA) during fiscal years 2008-2011. The MTIP lists federally funded and locally funded projects that comprise construction and operational improvements anticipated by local agencies and the Oregon Department of Transportation (ODOT).

The MTIP contains a four-year listing of anticipated expenditures for locally funded projects drawn from the capital improvement programs of Eugene, Springfield, Coburg, Lane County, Lane Transit District, Willamalane Park and Recreation District, and ODOT. In addition, the MTIP lists projects for which application of specific federal funds will be made in the next four years. Priorities for the use of federal Surface Transportation Program–Urban (STP-U) funds are established during development of the MTIP.

Projects included in the MTIP for receipt of federal funds must also be included in or consistent with the region's long-range transportation plan. As such, the MTIP is an important tool in guiding the implementation of the region's long-term goals and addressing the region's long-range transportation needs.

By adopting the MTIP, the Metropolitan Policy Committee (MPC) has selected the projects identified in Table 1, *Programmed Projects by Agency and Year*, for implementation and funding as scheduled. No additional action by MPC is required for the funding of these projects. The schedule of projects utilizes all of the anticipated federal funds as quickly as possible. If additional funds become available or if a project experiences an unexpected delay, MPC may select other projects from the first three years of the schedule to take advantage of the additional funds or to replace a delayed project.

MTIP Requirements

Federal legislation (23 CFR 450.324) requires that Central Lane Metropolitan Planning Organization (MPO), in cooperation with the state and transit operators, develop an MTIP that is updated and approved at least every four years by MPC and the Governor. The prior MTIP, FY06-09, was adopted on July 13, 2006 and was conformed on August 22, 2006. Adoption of the FY08-11 MTIP will restart the four year clock.

Copies of the MTIP are provided to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). Specific requirements for the MTIP are outlined in various implementation rules developed by FHWA, FTA, and the Environmental Protection Agency (EPA). This section of the MTIP provides a brief explanation of these requirements.

Federal Requirements

Regulations developed to help guide the implementation of the Intermodal Surface Transportation Act of 1991 (ISTEA), Transportation Equity Act for the 21st Century (TEA-21), and Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), specify several requirements:

Time Period (23 CFR 450.324(a))

The MTIP must cover a period of not less than four years. Beyond the four year period, projects in outlying years are considered informational only. The MTIP must be updated at least every four years.

Public Involvement and Comment (23 CFR 450.324(b))

There must be reasonable opportunity for public comment prior to approval, and the MTIP must be made readily available including in electronically accessible formats and means such as publication on the World Wide Web. Specific procedures as approved by MPC are outlined in the MPO's Public Participation Plan.

Projects (23 CFR 450.324(c), (d), (g))

The MTIP must include all federally funded projects (including pedestrian walkways, bicycle transportation facilities, and transportation enhancement projects) to be funded under Title 23 and the Federal Transit Act, and all regionally significant projects requiring an action by USDOT regardless of funding source, within the MPO area. Projects in the MTIP must be consistent with the long-range transportation plan

Financial Constraint (23 CFR 450.324(f),(i))

The MTIP must be consistent with funding that is expected to be available during the relevant period. The MTIP must be financially constrained by year and include a financial plan that demonstrates which projects can be implemented using current revenue sources and which projects are to be implemented using proposed revenue sources. Only projects for which funds are reasonably expected to be available can be included in the MTIP. Since the MPO area is an air quality maintenance area, projects included in the first two years of the MTIP must be limited to those for which funds are available or committed.

Allocation of Surface Transportation Program – Urban (STP-U) Funds (23 CFR 450.324(j))

As a Transportation Management Area (TMA), the Central Lane MPO is required to develop a process for allocating the MPO's Federal Surface Transportation Program Urban (STP-U) funds. STP-U funds are allocated and programmed for eligible projects at the discretion of the MPO, following federal guidelines. These federal funds must be matched with local funds or other non-federal funds at a minimum currently set by Congress at 10.27 percent of the total funding. In other words, a project totaling \$100,000 would have a local match of \$10,270 and a federal STP-U component of \$89,730.

The MPO Policy Board has approved a process for the use of a set of screening or eligibility criteria and a set of evaluation criteria and guidelines to be applied to applications for STP-U funding. MPC approved the process and set target funding levels for three categories of need. Appendix A provides additional details on the current STP-U fund allocation process. The application forms developed for this process are presented in Figures A-3 and A-4.

Relationship between MTIP and the Statewide Transportation Improvement Program (STIP) (23 CFR 450.324(a))

The frequency and cycle for updating the MTIP must be compatible with Oregon's Statewide Transportation Improvement Program (STIP) development and approval process. The current MTIP expires when FHWA and FTA approval of the current STIP expires. After approval of the MTIP by MPC and the Governor, the MTIP must be included without modification directly or by reference in the STIP. The portion of the STIP in the metropolitan planning area shall be developed by the Central Lane MPO in cooperation with ODOT.

1990 Clean Air Act Amendments

On November 15, 1990, amendments to the Clean Air Act (Act) were approved by the federal government. On June 7, 1991, the EPA and the U.S. Department of Transportation issued guidance for determining conformance of transportation programs with the Act during this interim period. On July 16, 1991, these interim guidelines were provided to the MPOs in Oregon. New conformity guidelines were issued in November 1991, and most recently on July 1, 2004.

On March 3, 1995 the Environmental Quality Commission (EQC) adopted new rules regarding the air quality conformity of transportation plans, programs and projects to federal and state implementation plans (the Oregon Conformity State Implementation Plan (SIP)). These rules establish criteria and procedures for determining such conformity. The state rule mirrors, and in some instances is more stringent than, the federal rule. By meeting the state standards for purposes of demonstrating air quality conformity, the federal standards are also met.

The Central Lane MPO region has been redesignated to attainment status for CO and is in the required maintenance period (1994-2014). There has not been a violation of the CO standards since 1980. Demonstration requirements in the state and federal rules include conformity analysis for the regional transportation plan (RTP), the MTIP, and projects contained in the MTIP (23 CFR 450.324(a)). A conformity analysis is required to show that any additions to the transportation system do not jeopardize the region's attainment and maintenance of the air quality standards. Specifically, the state rule states that demonstration of conformity for CO is consistent with the motor vehicle emissions budget in the CO SIP.

The Eugene-Springfield PM₁₀ State Implementation Plan established that emissions from motor vehicles are not a significant contributing factor to overall PM₁₀ emissions and concludes that control of emissions from motor vehicles is not necessary to demonstrate attainment of the PM₁₀

standards. EPA has approved and concurred that Plan and MTIP conformity determinations for PM₁₀ are not required. There has not been an exceedance of the PM₁₀ standards in this area since 1987. The Lane Regional Air Pollution Authority (LRAPA) is in the process of applying to the federal Environmental Protection Agency for a redesignation of the Eugene-Springfield area to attainment status for PM₁₀.

Regional emissions analysis is required on regionally significant projects (Appendix B) located within the 1987 Central Area Transportation Study (CATS) boundary as specified in the Eugene-Springfield CO SIP. This area encompasses the greater downtown Eugene area and is bounded by 5th Avenue on the north, 19th Avenue on the south, Lincoln Street on the west, and Agate Street on the east. EPA has determined that the nature of the CO problem in the Central Lane area is limited to the CATS boundary. All transportation projects within the Central Lane Air Quality Maintenance Area (approximately the Eugene/Springfield UGBs) are subject to the “project-level conformity” requirements.

The conformity analysis for the FY08-11 MTIP will be available under separate cover.

Development and Modification of the MTIP

The draft Central Lane MTIP was developed by the Transportation Planning Committee (TPC), the regional staff group which is responsible for most of the technical details of the transportation planning process. The TPC assembled the MTIP from the adopted capital improvement programs (CIPs) and other capital planning documents and input from the participating agencies, as well as from the overlapping years of the previous (FY06-09) MTIP.

TPC recommends the MTIP to the MPC for review and adoption. As the Central Lane MPO policy body, MPC, which is composed of elected or appointed officials from Eugene, Springfield, Lane County, Lane Transit District, Coburg and ODOT, conducts a public hearing and adopts the MTIP. The Citizen’s Advisory Committee may also review and comment on the MTIP. The MPO’s Public Participation Plan (PPP) specifies public outreach and involvement activities associated with adoption and amendment of the MTIP. Membership of TPC, MPC and the CAC is shown in Appendix C.

Objectives of the process for developing and amending the MTIP include:

- Ensure that federal requirements are properly met for use of available federal funds, including the requirement that projects using federal funds are included in the TIP and that the projects are consistent with the financially constrained element of the Regional Transportation Plan (RTP),
- Ensure regional consideration of proposed amendments having an impact on the priority for use of limited available resources or having an effect on other parts of the transportation system, other modes of transportation or other jurisdictions,
- Ensure that the responsibilities for project management and cost control remain with the jurisdiction sponsoring the project,
- Authorize routine amendments to the MTIP to proceed expeditiously to avoid unnecessary delays and committee activity,

- Provide for dealing with emergency situations, and
- Ensure projects are progressing to fully obligate annual funding in order to avoid a lapse of funds.

The MTIP may be modified by the MPC. TPC may make specific changes determined to be administrative in nature. These include:

1. Additions or deletions of projects which do not involve any funding decision or funding transfer on the part of the MPO (for example, projects which are already fully funded via local, state or federal processes and are required to be included in the MTIP) and which do not affect the financial constraint or air quality conformity of the MTIP,
2. Cost revisions to reflect funding decisions at the local, state or federal level which do not involve any further funding decision on the part of the MPO and which do not affect the financial constraint or air quality conformity of the MTIP,
3. Deletions of local projects which are provided for information purposes,
4. Moving projects from one year to another year in the MTIP period if they do not trigger the need for an air quality conformity determination,
5. Change in project scope, where no funding decision or funding transfer by the MPO is involved, and which does not affect the air quality conformity of the MTIP,
6. Combining or separating projects (for contracting efficiency or other purposes) in the adopted MTIP where the project scope is unchanged and the total project cost is unchanged or involves a minor cost revision,
7. Moving funding from one project phase to another within the same project where no funding decision or funding transfer by the MPO is involved,
8. Other minor cost revisions that do not affect financial constraint of the MTIP or the MTIP's air quality conformity,
9. Emergency additions where an imminent public safety hazard is involved,
10. Recommendation for Project or Program Authority Retraction
 - a. Agencies that have not completed a project prospectus or contract with the ODOT local programming unit, have not obligated project authority or have not received approval of an amendment to reprogram fund authority by the end of the federal fiscal year in which their project was programmed for funding are subject to potential retraction of fund authority. These agencies will be notified by the MPO of this status when it occurs and will have 60 days from the date of the notification documentation to complete the prospectus, contract, obligation or amendment prior to consideration by TPC of a recommendation to MPC for an amendment to retract the funding authority for the project or program.
 - b. Unspent or un-obligated MPO flexible funding authority following final voucher closing of a project reverts back for redistribution through the regional project prioritization process.

Minor corrections to make the MTIP consistent with naming conventions or a jurisdiction's project description language, or to fix typographical errors or missing data, may be made by MPO staff.

All administrative amendments approved by TPC shall be forwarded to MPC for information purposes. MPC may request further review of administrative amendments.

Major projects from the prior MTIP that are not included in the current project list (see next section) are listed in Appendix G.

Project Lists (23 CFR 450.324(e))

Table 1 presents the list of Projects by agency and by year, including federally funded projects. Projects in this table are consistent with Regional Transportation Plan policy and include local projects that implement the RTP. This table also indicates if the project is outside the air quality maintenance area, and if not, if it is within the 1987 CATS area. Projects that are exempt from emissions modeling (see Appendix B) are indicated, as is the first analysis year in which a non-exempt project is modeled for the conformity determination. The TPC, as the standing committee for air quality under the Oregon Conformity Rulings, has established criteria for determining regionally significant projects (see Appendix B). For more details, see the corresponding air quality conformity determination.

There are no transportation control measures (TCMs) specified for this area. (23 CFR 450.324(e)(5))

This area does not have required Americans with Disabilities Act paratransit and key stations plans. (23 CFR 450.324(e)(7)).

Description of Project Listings

Individual projects vary enough that their descriptions are necessarily general. For street projects, all are assumed to be urban cross-section with curb, gutter, underground drainage, and sidewalks, unless otherwise noted. When provisions for bicycles are anticipated, they are specifically mentioned.

Projects are grouped by agency responsible for carrying out the project.

Project name is prepared based on ODOT conventions, and is the name by which the project is known in the State Transportation Improvement Program (STIP).

Project description is the description provided by the project sponsor; due to STIP constraints, this description may be abbreviated when included in the STIP.

RTP project number provides an indication of the consistency of the project with the long-range plan. A number indicates that the project was specifically identified in the 2025 RTP, as adopted on December 9, 2004, and corresponds to its project number. For projects not specifically identified in the RTP, an RTP policy is indicated to demonstrate consistency with the plan.

Air Quality Status indicates whether a project has exempt status (based on State and Federal rules as described in Appendix B) or otherwise, lists the first analysis year in which the project was modeled for CO emissions.

Key number is the project number, assigned by ODOT, by which the project is known in the STIP. A project which covers several years may have a different key number for each year.

Fiscal Year is the Federal fiscal year in which the funds for the indicated project phase or stage are expected to be obligated through a contractual or intergovernmental agreement.

Phase indicates the type of work undertaken in the year indicated. For projects other than transit or study, this is typically planning, preliminary engineering, right of way acquisition, utility relocation, or construction.

Federal Cost and Source indicate the amount of federal funding that is programmed for this phase, and the type of federal funds (see below).

Federal Required Match Cost and Source indicate the amount of local money that must be programmed in order to match the federal funding. This is typically 10.27% or 20% of the total project cost, depending on the federal source.

Other Cost and Source indicates local funds that are programmed for the project phase in excess of any federal funds or local match to federal funds.

Total All Sources indicates the cost estimate of the project phase or stage regardless of fund source.

Costs are only estimates, although some are more refined than others.

Funding source refers to the agencies expected to participate in the project. In some cases, funding agreements have not yet been finalized so agencies listed will not necessarily participate in the project listed. A description of the various funding sources is provided in Appendix D. Meanings of the abbreviations used in MTIP tables are as follows:

A	Assessment of adjacent property owners
B3A1	same as OTIA
C	City of Coburg
D	Private Developer
E	City of Eugene
FAA	Federal Aviation Administration
F160	same as 5310
H010	same as Interstate Maintenance
IM	Interstate Maintenance
H050	National Highway System
H210	STP Optional Safety
HBR	Highway Bridge Replacement Funds

HCB	High Cost Bridge Projects
HEP	Hazard Elimination Program
HY10	Federal earmark
L050	National Highway System
L220	Transportation Enhancement funds
L230	same as STP-U
L240	same as STP
LC	Lane County
LCOG	Lane Council of Governments
LS30	same as STP-Safety
LTD	Lane Transit District
LY10,20,30,40	Federal earmark
NHS	National Highway System
ODOT	Oregon Department of Transportation
OTIA	Oregon Transportation Investment Act
RRP	Rail-Highway Protection (off-system)
RRS	Rail-Highway Protection (on-system)
S	City of Springfield
State Bike/Ped	State, Bike/Pedestrian program funds
5303	Federal Transit Act (FTA), Metropolitan Planning Program
5307	Federal Transit Act (FTA), Formula Funds
5309	Federal Transit Act (FTA), Capital Program
5310	Federal Transit Act (FTA), Elderly and Persons with Disabilities
5311	Federal Transit Act (FTA) Non-urbanized Area Formula Program funds
5316	Federal Transit Act (FTA), Job Access/Reverse Commute Program
5317	Federal Transit Act (FTA), New Freedoms Program
SDC	System Development Charge
STF	Special Transportation Fund
STP	Surface Transportation Program
STP-Safety	Surface Transportation Program – Safety Program
STP-U	Surface Transportation Program – TMA/urban areas (funds programmed by the MPO)
STP-E	Surface Transportation Program Enhancement
STP-RR	Surface Transportation Program – Railroad
TSM	Federal Transportation Systems Management Grants

Eugene, Springfield, and Lane County have remonstrance clauses in their charters that may allow property owners to object to assessments on some types of street projects. Thus, anticipated assessments on some projects may not materialize.

For a project which began prior to FY08, phases that are either under contract, under construction or completed are included here for informational purposes. These phases are listed by the earlier year and are shown in italics.

Note on Locally Funded Projects

Since the Eugene-Springfield area is classified as a maintenance area for CO emissions, all regionally significant projects regardless of funding source must be included for

informational purposes and air quality analysis. Each metropolitan area has the option of including other projects in the MTIP. For purposes of providing comprehensive information on transportation improvements programmed for the Central Lane area, an attempt has been made to include all major transportation projects in Table 1. Improvements to minor streets and maintenance activities were excluded. Local projects listed in Table 1 are based on adopted local CIPs and other local master plans or transportation project approval processes.

Table 1: Programmed Projects by Agency

Central Lane MPO FY08-11 Project List

(Projects within Air Quality CATS area are shaded in grey; Project phases for years prior to FY08 show funding already committed for this project)

Eugene Train Depot (Unit 2)	The next phase of work for the Eugene Depot, funded by the SAFETEA_LU bill, will include site improvements near the historic Depot building with new paving, permanent traffic markings and crosswalks, more pedestrian sidewalks, and additional amenities to create an easily recognized public transportation service center. The Depot building and site will receive communications and security improvements to enhance service to the public. The project will also provide paving and lighting on city land along the railroad right of way, enhancing the appearance of the platform area for the rail passenger and coordinated to work with future platform enhancements, rail re-alignments, and a planned track spur. BRT Progressive Corridor Enhancement	Progressive Corridor Enhancement is a project to put in some elements of BRT along a corridor. Three corridors will be developed. Each corridor will have transit signal priority, some wider stop spacing, more passenger shelters at stops, and some service changes. Service changes include establishing a feeder/trunk system (corridor route separated from the neighborhood route), 15-minute corridor service during weekdays, and creating routes that span the metro area (travel through downtown rather than starting and ending downtown). No new roadway will be constructed. The first corridor is currently being considered. The second and third corridors have not been selected. NOTE: SAFETEA-LU earmark programs \$669K in FY09 subject to Federal appropriation.	1115	Analysis Year 2031 with progressive improvements evaluated at next conformity determination	14606	FY06	Other	\$ 569,845				\$ 712,306			\$ 712,306

Demonstration of Financial Constraint

As indicated above, Federal regulations require that the MTIP be financially constrained by year. Specifically, the MTIP:

“shall be financially constrained by year and include a financial plan that demonstrates which projects can be implemented using current revenue sources and which projects are to be implemented using proposed revenue sources”

The financial plan must be developed by the MPO in cooperation with the state and the transit operator. ODOT and the Lane Transit District must provide the MPO with estimates of available federal and state funds, which the MPO must utilize in developing financial plans. Only projects for which construction and operating funds can reasonably be expected to be available may be included. Projects in the first two years of the MTIP must be limited to those for which funds are available or committed. In the case of new funding sources, strategies for ensuring their availability must be identified. In developing the financial analysis, the MPO must take into account all projects and strategies funded under Title 23, U.S.C., the Federal Transit Act, other federal funds, local sources, state assistance, and private participation.

Table 2 below provides a summary of the financial analysis and demonstrates that the MTIP is financially constrained. Revenues in the first two years are committed, as programmed in the capital improvement programs of the local and state jurisdictions. All funds are from current revenue sources.

Table 2. FY08-11 Financial Constraint Assessment

Description	FY08-11 MTIP (\$)				Total
	FY08	FY09	FY10	FY11	FY08 – FY11
Total Revenue	\$43,547,535	\$71,179,081	\$20,559,301	\$171,069,001	\$306,354,918
Total Expenditures	\$43,547,535	\$71,179,081	\$20,559,301	\$171,069,001	\$306,354,918
Difference Between Revenues & Expenditures	\$0	\$0	\$0	\$0	\$0
Statement of Financial Constraint: Each project programmed in the FY08-11 MTIP has an identified funding source or combination of sources reasonably expected to be available over the planning period. Funds for FY08-09 projects are available or committed.					

Table 3 summarizes the costs for each year of the MTIP for each agency.

Appendix A
STP-U Allocation Process

Appendix A: STP-U Fund Allocation Process

As a Transportation Management Area (TMA), the Central Lane MPO is required to develop a process for allocating the MPO's Federal Surface Transportation Program Urban (STP-U) funds. STP-U funds are allocated and programmed for eligible projects at the discretion of the MPO, following federal guidelines. These federal funds must be matched with local funds or other non-federal funds at a minimum currently set by congress at 10.27 percent of the total funding. In other words, a project totaling \$100,000 would have a local match of \$10,270 and a federal STP-U component of \$89,730.

The MPO Policy Board has approved a process for the use of a set of screening or eligibility criteria and a set of evaluation criteria and guidelines to be applied to applications for STP-U funding. MPC approved the process and set target funding levels for 3 categories of need. This appendix provides additional details on the current STP-U fund allocation process. Figure A-1 presents the process approved for the programming of STP-U funds for Transportation Demand Management (TDM) & Transportation Options (TO) activities and Planning activities. Figure A-2 presents the process approved for the programming of STP-U funds for Preservation, Project Development and Modernization activities. The application forms developed for these processes are presented in Figures A-3 and A-4.

APPLICATION FOR CENTRAL LANE MPO FY2007-08 STP-U PLANNING FUNDS

August/September, 2006

(NOTE: Applications accepted through September 15, 2006 for FY07 and FY08 Planning funding)

Date of this Application _____ Contact Person _____

A. Background Information

1. Lead Agency: _____

2. Project Title: **Regional Transportation Planning**

3. STP-U Project Category: **Supplemental Planning** (above baseline)

4. Project Description: **Include in description how activities address regional planning priorities** MPO's regional planning priorities include, but are not limited to, those shown on the back of this form. *You may submit one application for the 2-fiscal-year period, or two separate applications. Attach additional information, if applicable.*

5. Project Cost Estimate: (all numbers in \$000s)

FY07 STP-U Planning funds requested for this project	\$ _____
Other funding #1 (list type of funds, e.g. federal, state, local, etc.) _____	\$ _____
Other #2 _____	\$ _____
Total FY07 cost estimate	\$ _____
FY08 STP-U Planning funds requested for this project	\$ _____
Other funding #1 (list type of funds, e.g. federal, state, local, etc.) _____	\$ _____
Other #2 _____	\$ _____
Total FY08 cost estimate	\$ _____

(Note: Total non-federal funding must meet minimum match requirement of 10.27% of total project cost – 11.45% of federal dollars)

MPO planning/process priorities include,
but are not limited to:

- **MPO priorities established in UPWP & federal requirements**
- **SAFETEA-LU compliance**
 - **Congestion Management Process (CMP)**
 - **Establishing CMP**
 - **AMS process**
 - **Study of priority locations for traffic counts and provision of traffic counts**
- **e-MPO**
 - **Regional coordination of project and other information**
 - **Centerline coordination with e-MPO and Project Coordination efforts**
- **State system regional project planning & NEPA activities**
 - **I-5/Franklin system planning**
 - **Beltline system planning**
 - **OR126 Expressway Management Plan**
 - **Coburg Interchange Area Management Plan (IAMP)**
- **Coordinated public transit/human services plan**
- **Transportation planning for RTP implementation (such as nodal planning (e.g., Walnut Node) & other activities**
- **Local transportation planning and coordination as part of regional system**

Figure A-4

**APPLICATION FOR CENTRAL LANE MPO FY2007-09 STP-U FUNDS
PRESERVATION, MODERNIZATION, PROJECT DEVELOPMENT**

December, 2006

(NOTE: Applications accepted through December 20, 2006 for FY07, FY08 & FY09 funding. Please submit one application per project. Maximum of two applications per jurisdiction for each fiscal year.)

Date of this Application _____ Contact Person _____

A. Background Information

1. Lead Agency: _____

2. Project Title: _____

3. STP-U Project Category (circle/mark one): **Preservation** **Modernization** **Project
Devel.**

**PLEASE NOTE: IF DESIRED, § 4, 7 & 8 MAY BE ADDRESSED TOGETHER IN ONE NARRATIVE
ATTACHMENT**

4. Project Description: **Include in description how activities address regional priorities**
Attach additional information, if applicable.

5. Screening/Eligibility Criteria: **Indicate Yes/No for each; Provide details as needed**

- a) **Listed in, or consistent with, financially constrained RTP**
- b) **Ability to utilize funds in FY requested**
- c) **For eligible purpose under Federal guidelines**

See <http://www.lcog.org/meetings/mpc/0706/MPC4.e-Attachment3-FederalGuidelinesforSTP-U.pdf>

- d) **Can provide minimum required matching funds (10.27% of project total)**
- e) **Sufficient identified funding to complete project/phase**

6. Project Cost Estimate: **Indicate Fiscal Year, STP-U Funds Requested, Other Funding**

FY__ STP-U funds requested for this project	\$
Other funding (list type of funds, e.g. federal, state, local, etc.) _____	\$
Other funding _____	\$
Total Cost Estimate	\$

(Note: Total non-federal funding must meet minimum match requirement of 10.27% of total project cost – 11.45% of federal dollars)

7. Other Project Information: To the extent *not* discussed in the project description, address the following items from the July, 2006 *CLMPO STP-U Process: Preservation, Project Development and Modernization Activities* diagram.

(<http://www.lcoq.org/meetings/mpc/0706/MPC4.e-Attachment2-STP-UMod&Pres.pdf>)

- a. Description of need or problem addressed
- b. How project addresses MPO’s regional priorities
- c. Assessment of magnitude of potential STP-U “overhead cost”
- d. Specific benefits of project
- e. “Cost” of not doing activity/project (or description of opportunity lost)
- f. Expected outcomes & deliverables

8. Project Technical Information: To the extent not previously discussed, provide technical information for the proposed project that will assist in the staff evaluation of the application. Sample technical considerations identified during the July, 2006 MPO STP-U process approval include:

- **Safety Enhancement** Project will address existing safety issue. Identify safety issue (sight line, design element, deterrent to bicycling, etc.). If available, cite safety statistics (crash rate, etc.).
- **Urban Standards** Project brings facility to current urban design standard. Project adds urban design elements where current elements do not exist or are substandard, such as sidewalks, pedestrian crossing and/or transit stop improvements, bike facilities, storm water facilities, lighting, etc.
- **Preservation** Project provides long-term maintenance and preservation of the existing system. Demonstrate preservation need (for example, condition rating).
- **Multiple Modes** Identify how project will benefit more than one mode or purpose (i.e., benefits roadway & transit, benefits bicycle & roadway users, or benefits roadway & identified freight route).
- **Congestion Reduction** Project reduces congestion through provision of additional capacity or critical link or other means. Identify existing congested conditions that project will address. Identify modeled or projected impact on congestion.
- **Increase Alt. Mode Share** Identify how project will increase use of alternative modes (non-single occupant vehicle–SOV–use such as transit, bicycle, pedestrian).
- **Usage** Identify existing or projected daily traffic volume (roadway), ridership (transit) or other measure of use of facility. Demonstrate significance of project to the regional system.
- **Freight** Identify project benefits to freight system/movements.
- **Air Quality** If applicable, identify air quality benefits of project.

Appendix B
Air Quality Exemptions and
Regionally Significant Project Description

Appendix B: Air Quality Exemptions and Regionally Significant Project Description

The Transportation Planning Committee, as the standing committee for air quality under the Oregon Conformity Rulings, has determined regionally significant projects to be:

A transportation project, other than an exempt project, that is on a facility which serves regional transportation needs, such as access to and from the area outside the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves, and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum:

- *All fixed guideway transit facilities that offer an alternative to regional highway travel;*
- *Projects on facilities classified as arterial level and above;*
- *Projects on multi-lane facilities that impact speed and/or capacity; and*
- *Construction of new roadways classified as arterial level and above.*

Exempt Projects

OAR 340-252-0270 Notwithstanding the other requirements of this rule, highway and transit projects of the types listed in Table 2 are exempt from the requirement that a conformity determination be made. Such projects may proceed toward implementation even in the absence of a conforming transportation plan and MTIP. A particular action of the type listed in Table 2 of this section is not exempt if the MPO or ODOT in consultation with other agencies under OAR 340-252-0060, and the EPA, and the FHWA (in the case of a highway project) or the FTA (in the case of a transit project) concur that it has potentially adverse emissions impacts for any reason. States and MPOs must ensure that exempt projects do not interfere with TCM implementation.

Table 2 - Exempt projects

Safety

Railroad/highway crossing.
Hazard elimination program.
Safer non-Federal-aid system roads.
Shoulder improvements.
Increasing sight distance.
Safety improvement program.
Traffic control devices and operating assistance other than signalization projects.
Railroad/highway crossing warning devices.
Guardrails, median barriers, crash cushions.
Pavement resurfacing and/or rehabilitation.
Pavement marking demonstration.
Emergency relief (23 U.S.C. 125).

Fencing.
Skid treatments.
Safety roadside rest areas.
Adding medians.
Truck climbing lanes outside the urbanized area.
Lighting improvements.
Widening narrow pavements or reconstructing bridges (no additional travel lanes).
Emergency truck pullovers

Mass Transit

Operating assistance to transit agencies.
Purchase of support vehicles.
Rehabilitation of transit vehicles.
Purchase of office, shop, and operating equipment for existing facilities.
Purchase of operating equipment for vehicles (e.g., radios, fareboxes, lifts, etc.).
Construction or renovation of power, signal, and communications systems.
Construction of small passenger shelters and information kiosks.
Reconstruction or renovation of transit buildings and structures (e.g., rail or bus buildings, storage and maintenance facilities, stations, terminals, and ancillary structures).
Rehabilitation or reconstruction of track structures, track, and trackbed in existing rights-of-way.
Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of the fleet.
Construction of new bus or rail storage/maintenance facilities categorically excluded in 23 CFR 771.

Air Quality

Continuation of ride-sharing and van-pooling promotion activities at current levels.
Bicycle and pedestrian facilities.

Other

Specific activities which do not involve or lead directly to construction such as:
 Planning and technical studies.
 Grants for training and research programs.
 Planning activities conducted pursuant to titles 23 and 49 U.S.C.
 Federal-aid systems revisions.
Engineering to assess social, economic, and environmental effects of the proposed action or alternatives to that action.
Noise attenuation.
Advance land acquisitions (23 CFR 712 or 23 CFR 771).
Acquisition of scenic easements.
Plantings, landscaping, etc.
Sign removal.
Directional and informational signs.
Transportation enhancement activities (except rehabilitation and operation of historic transportation buildings, structures, or facilities).
Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity changes.

Projects exempt from regional emissions analyses

340-252-0280 Notwithstanding the other requirements of this rule, highway and transit projects of the types listed in Table 3 of this section are exempt from regional emissions analysis requirements. The local effects of these projects with respect to CO or PM-10 concentrations must be considered to determine if a hot-spot analysis is required prior to making a project-level conformity determination. These projects may then proceed to the project development process even in the absence of a conforming transportation plan and MTIP. A particular action of the type listed in Table 3 is not exempt from regional emissions analysis if the MPO or ODOT in consultation with other agencies, the EPA, and the FHWA (in the case of a highway project) or the FTA (in the case of a transit project) concur that it has potential regional impacts for any reason.

Table 3 - Projects Exempt From Regional Emissions Analyses

Intersection channelization projects.
Intersection signalization projects at individual intersections.
Interchange reconfiguration projects.
Changes in vertical and horizontal alignment.
Truck size and weight inspection stations.
Bus terminals and transfer points.

Appendix C
Transportation Committees of
the Central Lane MPO

Appendix C: Transportation Committees of the Central Lane MPO

Metropolitan Policy Committee (As amended February 2003)

Two Council Members of the Eugene City Council
Two Council Members of the Springfield City Council
Two Commissioners of Lane County
Two Board Members of Lane Transit District
One Council Member of the City of Coburg
One Member from ODOT
City Manager, Eugene (non-voting)
City Manager, Springfield (non-voting)
County Administrator, Lane County (non-voting)
General Manager of Lane Transit District (non-voting)
City Administrator, City of Coburg (non-voting)
Director of the Oregon Department of Transportation or his/her designee (non-voting)

Transportation Planning Committee (As amended May 2005)

Director of Public Works - Lane County
Director of Public Works - City of Eugene
Director of Public Works - Springfield
Director of Planning - Lane County
Planning Director - City of Eugene
Planning Manager - City of Springfield
Director of Development Services - Lane Transit District
Director of Marketing and Communications - Lane Transit District
Transportation Planning Engineer - Lane County
Transportation Engineer - City of Eugene
Traffic Engineer - City of Springfield
Region 2 Transportation Representative - Oregon Department of Transportation
Manager - Eugene Airport
Representative - Lane Regional Air Pollution Authority
Representative - City of Coburg
Commuter Solutions Program Manager

Federal Highway Administration Division Planning Engineer (non-voting ex-officio member)
MPO's Citizens' Advisory Committee (CAC) chair (non-voting ex-officio member)

Citizen Advisory Committee (As adopted September 2004)

Up to 15 citizens selected from within the MPO area.

Appendix D
Financial Resources

Appendix D: Financial Resources

Many sources of funding are available for transportation projects from federal, state, and local sources. A short explanation of the different funding programs follows.

Federal Sources

The MTIP development process must address the requirements as defined in the TEA-21 and the SAFETEA-LU transportation acts and give full consideration to the flexibility provisions in these acts. Reflecting the broader mandates of the transit program, the Federal Transit Administration administers transit programs.

Surface Transportation Program (STP), a block grant program replacing federal-aid systems, is available for all roads not functionally classified as local or rural minor collector. Transit capital projects and bicycle-pedestrian projects are also eligible under this program.

Enhancement funds are available for environmental programs such as pedestrian and bicycle activities and mitigation of water pollution due to highway runoff. Enhancement projects must have a direct relationship to the intermodal transportation system and go beyond what is customarily provided as environmental mitigation. Requests for enhancement funding will be submitted to the Oregon Department of Transportation (ODOT) and the Oregon Transit Commission (OTC) as part of the metropolitan planning process.

FTA Section 5309 funds are available for transit capital improvements. Funds are administered by the FTA regional office and are granted on a project-by-project basis. Lane Transit District (LTD) anticipates receiving some Section 5309 funds during the next five years. Should these funds be available, they will be used to finance one-time capital improvements. The funding ratio for these funds is 80 percent federal and 20 percent local.

FTA Section 5307 funds are distributed on a statutory formula basis to support capital, operating, and planning expenditures for publicly owned transit systems. LTD anticipates receipt of some funding from this program in the next few years. When used for capital or planning projects, Section 5307 funds have a funding ration of 80 percent federal and 20 percent local; when used for operations, the maximum federal percentage is 50 percent.

FTA Section 5310 program provides transportation services for elderly and disabled persons. The funds are allocated to ODOT for distribution to local transit agencies. The funds may go to private, non-profit organizations or to public bodies that coordinate service. ODOT is currently recommending an allocation formula based on operating miles and population. OTC will make a decision on the allocation formula when it adopts the transit section of the ODOT Transportation Improvement Program (STIP).

FTA Section 5311 funds are used to fund capital, operating, and planning needs of public transit. The Section 5311 program also provides for planning, marketing, capital assistance, purchase of

service agreements, user-side subsidy projects and demonstrations, and rural connections coordinating between inter-city bus and rural public transportation operators.

FTA Section 5316 funds (Job Access – Reverse Commute) are used to support the development and maintenance of transportation services so that welfare recipients and eligible low-income individuals can access jobs and job-related activities.

FTA Section 5317 funds (New Freedom) are used to provide improved public transportation services and alternatives to public transportation, for people with disabilities, beyond those required by the Americans with Disabilities Act of 1990.

State Sources

The state plays a major role in the street and highway program and a minor role in the transit program.

The State Highway Fund consists primarily of user fees, such as the state gas tax, license fees, and weight-mile tax. Nearly one-third of the fund is transferred to cities and counties throughout the state for street and highway improvements. Most of the remaining portion of the fund is available to the state for maintenance, state construction, and matching of federal aid funds. One percent of state highway construction funds are required by law to be used for bicycle facilities. Priorities for use of the State Highway Fund are established by the OTC. Generally, the state provides the entire eight percent match required on interstate projects and half of the 12 percent match required on federal highway-related projects.

The State General Fund is the source of funding for the State's Public Transit Division, including funds that it distributes to transit districts including LTD. In the past, Oregon's Public Transit Division provided some funding for capital purchases. Future state funding for capital projects is uncertain.

The Oregon Transportation Investment Act (OTIA) was initiated by the Oregon state legislature in 2001-2002 to fund highway infrastructure. To date, a total of three acts (OTIA I, II and III) have resulted in the issuance of bonds to secure revenue for projects approved by the Oregon Transportation Commission.

Local Sources

The State Highway Fund Transfer results in state-collected user fees being distributed to the cities and county for local improvements. Eugene, Springfield, and Lane County collectively receive about \$4 million annually through this transfer. This amount could change if the state increases the gas tax, license fees, and weight-mile tax.

Federal Timber Receipts received by Lane County from timber sales on federal lands make up a majority of the County's budget for street and highway improvements. By law, 75 percent of the Federal Timber Receipts must be used for street and highway projects, but legislative proposals

at the federal and state levels could reduce this percentage. Federal Timber Receipts currently account for a significant portion of the county's annual road improvement budget.

Economic Development Assistance Program funds are available from Lane County to finance public road improvements needed for projects that result in the creation or retention of permanent jobs.

Assessments of adjoining property owners often constitutes a large portion of the total cost of specific street improvements. The assessment depends on the type of street and the agency. The cost of curbs, gutters, and sidewalks is usually assessed to property owners. Sometimes, assessments include part of the cost of the pavement, underground drainage and street lighting. The cost of features not normally required on similar streets, as well as oversize facilities or additional width, are absorbed by the implementing agency. The public works department of the implementing agency should be consulted for the specific details of the assessment on individual projects.

Local funds are derived by the cities from user fees, parking revenues, citations, bond issues, and other taxes. A large number of locally generated funds are used by the cities for street improvements. The Employer Payroll Tax accounts for a majority of LTD's local revenues.

Appendix E
Federal Guidelines for STP-U Funding

Appendix E: Federal Guidelines for STP-U Funding

SURFACE TRANSPORTATION PROGRAM (STP) ELIGIBLE EXPENDITURES

STATUS: ACTIVE

FEDERAL PARTICIPATION: Generally 80 percent. When STP funds are used for Interstate projects (including projects to add high occupancy vehicle or auxiliary lanes, but not any other lanes), the Federal share may be 90 percent. Certain safety improvements have a Federal share of 100 percent.

PERIOD AVAILABLE: FY + 3 Years

FUND: Highway Trust Fund

FUND DISTRIBUTION METHOD: Apportionment

AUTHORITY: Contract

SUBJECT TO OBLIGATION LIMITATION: Yes

STATUTORY REFERENCE: 23 U.S.C. 133, 104(b)(3), 140; SAFETEA-LU Sections 1101(a)(4), 1103(f), 1113, 1603, 1960, 6006

CFR REFERENCE: None

ELIGIBILITY: Funds apportioned to a State for the STP may be obligated for:

- Construction, reconstruction, rehabilitation, resurfacing, restoration, and operational improvements for highways including Interstate highways and bridges (including bridges on public roads of all functional classifications), including any such construction or reconstruction necessary to accommodate other transportation modes, and including the seismic retrofit and painting of and application of calcium magnesium acetate, sodium acetate formate, or other environmentally acceptable, minimally corrosive anti-icing and de-icing compositions on bridges and approaches thereto and other elevated structures, mitigation of damage to wildlife, habitat, and ecosystems caused by a transportation project funded under Title 23, United States Code,
- Capital costs for transit projects eligible for assistance under chapter 53 of Title 49, United States Code, including vehicles and facilities, whether publicly or privately owned that are used to provide intercity passenger service by bus,

- Carpool projects, fringe and corridor parking facilities and programs, bicycle and pedestrian facilities (off-road or on-road, including modification of walkways) on any public roads in accordance with 23 U.S.C. 217 and the modification of public sidewalks to comply with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.),
- Highway and transit safety infrastructure improvements and programs, hazard eliminations, projects to mitigate hazards caused by wildlife, and railway-highway grade crossings,
- Highway and transit research and development and technology transfer programs,
- Capital and operating costs for traffic monitoring, management, and control facilities and programs,
- Surface transportation planning programs,
- Transportation enhancement activities,
- Transportation control measures listed in Section 108(f)(1)(A) (other than clause xvi) of the Clean Air Act (42 U.S.C. 7407(d),
- Development and establishment of management systems under 23 U.S.C. 303,
- Habitat and wetlands mitigation efforts related to Title 23 projects
- Infrastructure based intelligent transportation systems capital improvements, and
- Environmental restoration and pollution abatement projects to address water pollution or environmental degradation caused or contributed to by transportation facilities, which projects shall be carried out when the transportation facilities are undergoing reconstruction, rehabilitation, resurfacing, or restoration; except that the cost of such environmental restoration or pollution abatement shall not exceed 20 percent of the cost of the 4R project.
- Advanced truck stop electrification systems
- Projects relating to intersections that: have disproportionately high accident rates; have high congestion; and are located on a Federal-aid highway
- Control of terrestrial and aquatic noxious weeds and establishment of native species.

BACKGROUND: The STP was established by Section 1007 of the Intermodal Surface Transportation Efficiency Act of 1991 (1991 ISTEA, Public Law 102-240) which added Section 133 to Title 23, United States Code. The 1991 ISTEA authorized \$23.9 billion to be appropriated out of the Highway Trust Fund for the 6-years FYs 1992-1997. These funds were apportioned to the States based on a State's percentage share of apportionments for FYs 1987-1991.

The Transportation Equity Act for the 21st Century (TEA-21, Public Law 105-178), enacted on June 9, 1998, authorized \$33.3 billion from the Highway Trust Fund for the 6-years FYs 1998-2003.

The Safe Accountable Flexible Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), enacted on August 10, 2005, authorizes from the Highway Trust Fund \$6.9 billion for FY 2005, \$6.3 billion for FY 2006, \$6.4 billion for FY 2007, \$6.5 billion for FY 2008, and \$6.6 billion for FY 2009 for the STP. The authorized amounts are subject to deductions of \$560,000 in FY2005 for Operation Lifesaver, \$5.25 million in FY 2005 for elimination of hazards at railway-highway crossings in high speed rail corridors, \$10 million in FY2005 and FY2006 for administration of the program for On-the-Job Training/Supportive Services, and \$10 million in FY2005 and FY2006 for administration of the Disadvantaged Business Enterprise Training program.

The SAFETEA-LU continues the TEA-21 formula for apportionment of STP funds to the States as follows:

- 25 percent in the ratio that total lane miles of Federal-aid highways in a State bears to total lane miles of Federal-aid highways in all States.
- 40 percent in the ratio that total vehicle miles of travel on lanes on Federal-aid highways in a State bears to the total vehicle miles of travel on lanes on such highways in all States, and
- 35 percent in the ratio the estimated tax payments attributable to highway users in each State paid into the Highway Trust Fund (other than the Mass Transit Account) in the latest fiscal year bears to the total of such payments in all the States.

Each State is to receive a minimum of 1/2 percent of the funds apportioned. The Equity Bonus Program replaces TEA-21's minimum guarantee program.

Each State' apportioned STP funds are suballocated in the following manner:

- Ten percent of each State's apportionment is set-a-side for safety construction activities (i.e., hazard elimination and rail-highway crossings) in FY2005 only.;
- Another 10 percent is set-a-side in FY2005 for transportation enhancements, which encompass a broad range of environmental related

activities; in FY2006 and thereafter, the set-a-side is the greater of 10% of the State's STP apportionment or the dollar amount of the 2005 set-a-side.

- Fifty percent (62.5 percent of the remaining 80 percent) of the funds is divided between urbanized areas over 200,000 in population ("STP-U" funds) and the remaining areas of the State. (The portion that goes to urbanized areas over 200,000 population must be distributed on the basis of population unless the State and relevant MPOs request the use of other factors and the FHWA approves. This provision is not applicable to Alaska and Hawaii.),
- The remaining 30 percent (37.5 percent of the remaining 80 percent) can be used in any area of the State. (This provision is not applicable to Alaska and Hawaii.),
- After FY2005, 62.5 percent of the amount remaining after the transportation enhancement set-a-side is divided among the sub-State areas based on population,
- As for TEA-21, States with STP funds suballocated to urbanized areas over 200,000 population must make obligation authority available in each of two 3-year periods, FYs 2004-2006 and FYs 2007-2009, and
- If a State or local government has failed to comply substantially with any provision of 23 U.S.C. 133 and the State fails to take corrective action within 60 days from the date of receipt of notification of noncompliance, future STP apportionments will be withheld until appropriate corrective action has been taken.

ADDITIONAL INFORMATION: Contact the Office of Metropolitan Planning and Programs (HEMP) or the Office of Program Administration (HIPA).

EUGENE										
Eugene Train Depot (Unit 2)	The next phase of work for the Eugene Depot, funded by the SAFETEA_LU bill, will include site improvements near the historic Depot building with new paving, permanent traffic markings and crosswalks, more pedestrian sidewalks, and additional amenities to create an easily recognized public transportation service center. The Depot building and site will receive communications and security improvements to enhance service to the public. The project will also provide paving and lighting on city land along the railroad right of way, enhancing the appearance of the platform area for the rail passenger and coordinated to work with future platform enhancements, rail re-alignments, and a planned track spur. Bus Rapid Transit Vehicles-2	Five vehicles are being purchased for the Franklin EmX corridor. These vehicles are hybrid electric vehicles, and will replace diesel-powered vehicles operating in existing service on this corridor, served by the number 11 route. The number 11 route will be replaced by the Franklin EmX Corridor Service. (FY06 project is a continuation of FY05 project where all programmed funds could not be expended because of timing issues in obtaining all the federal funds; 5309 funds are from FY05 omnibus bill)	complete	<u>14588</u>	FY06	Other	\$ 1,351,372	5309	\$ 1,689,215	2005-20 (04-07-73A) 2005-68 (06-06-01A_part3) 2006-76 (06-09-50)

Bus Rapid Transit, Phase One	Phase One of Bus Rapid Transit, also referred to as the Franklin EmX Corridor, is a four-mile corridor from downtown Eugene to downtown Springfield. The EmX service will provide rapid transit service through exclusive busways, low-floor vehicles, pre-paid fare mechanisms, and signal priority. This service will replace existing service, with the same frequency, currently provided by the number 11 route. Due to priority techniques such as exclusive busways and traffic signal priority, as well as hybrid-electric vehicles, it is anticipated that emissions for the EmX Franklin Corridor will be less than the existing conditions.	complete	<u>13285</u>	FY06	Other	\$ 3,974,649	5307	\$ 4,968,311	2005-67 (06-09-01A_part3) 2006-77 (06-09-50)

BRT Progressive Corridor Enhancement	<p>Progressive Corridor Enhancement is a project to put in some elements of BRT along a corridor. Three corridors will be developed. Each corridor will have transit signal priority, some wider stop spacing, more passenger shelters at stops, and some service changes. Service changes include establishing a feeder/trunk system (corridor route separated from the neighborhood route), 15-minute corridor service during weekdays, and creating routes that span the metro area (travel through downtown rather than starting and ending downtown). No new roadway will be constructed.</p> <p>The first corridor will be from LCC to River Road north of Beltline. This particular project may include a new turnaround/small station north of Beltline. Implementation of the first PCE corridor is expected in fall 2006. The second and third corridors have not been selected.</p> <p>NOTE: SAFETEA-LU earmark programs \$664K and \$669K in FY08 and FY09 subject to Federal appropriation.</p>	underway	<u>14606</u>	FY06	Other	\$ 564,147	5309	\$ 705,184	2005-85 (06-09-10A) 2007-19 (06-09-91A)
